Your active intermediate

Ethics, Commitment, Loyalty

Three basic principles that have earned Inortech an enviable reputation for honesty, integrity and unparalleled customer service. These fundamental principles have attracted highly qualified employees. Their varied expertise positions us to better understand and meet customer needs and supplier expectations.

Our unique technical service and R&D laboratory provides an added dimension to the in-depth technical expertise and cutting edge technology for which Inortech is already recognized.

The Inortech team constantly strives to improve customer service and increase our supplier's visibility in the focused markets we serve: coatings, ink, adhesive, and plastic.

Together we can go... **BEYOND**
chemistry

Votre intermédiaire actif

Éthique, Engagement, Loyauté

Voici trois principes de base qui ont valu à Inortech son enviable réputation d'honnêteté et de service à la clientèle inégalé. Ces principes fondamentaux ont attiré du personnel de haut calibre. Leurs expertises variées nous donnent une position privilégiée pour mieux comprendre et répondre aux besoins et demandes de nos clients ainsi qu'aux attentes de nos fournisseurs.

Notre laboratoire de service à la clientèle et de R&D a confirmé et a donné une nouvelle dimension ainsi qu'une profondeur d'expertise technique et d'innovation à l'avant-garde de la technologie qui était déjà reconnue à Inortech.

L'équipe d'Inortech travaille sans relâche pour améliorer son service à la clientèle et augmenter la visibilité de nos fournisseurs dans les marchés que nous desservons : revêtements, encres, adhésifs et plastiques.

Ensemble nous irons... **AU-DELÀ**

A Great First

Welcome to the Canadian Finishing and Coatings Manufacturing magazine's premier issue Buyers Guide. All listings are brand new. This is the most updated and most recent guide available in Canada for the paint and coating and finishing industries. This guide is colour coded for your convenience. It begins with an alphabetical company listing, offering names addresses and contact information as well as a company description. Then each company is listed under various lists of products and services, which will help guide you to the right contact. Categories include:

- Industrial Finishes
- Industrial Finishing Equipment
- Paint & Coating Raw Materials
- Paint & Coating Manufacturing Equipment
- Custom Coaters and Job Shops
- Associations, Education, & Government

Under these lists, find the product you want, then the company you want, then go to the alphabetical company

listings in order to contact them.

Every effort was made to contact manufacturers, suppliers, distributors, associations etc., to allow them an opportunity to submit a listing. We sent mail, e-mail and telephone calls, postings on our web site, as well as a notice in our April issue. If we missed you in this print version of the Buyers Guide, you may still submit your listing online and be included in the online version all year. Please visit www.cfcmmercuryemail.com and add your listing, which will appear online once it is approved by CFCM staff. You may make changes to your listing as many times as you wish throughout the year, but every change must wait for approval. From the Buyers Guide website, you may also download a pdf, fill it out and fax it to us if you wish.

Our print version is based on the information that appears in our online version.

There is always next year.

We hope you find this guide helpful and informative. If you have any questions or concerns please don't hesitate to contact us.

Atotech Canada's GMF TechCenter For The Automotive Industry

Atotech GMF TechCenters Worldwide:

Atotech Canada is pleased to announce the opening of its General Metal Finishing (GMF) Tech Center this fall! This latest addition will be the 11th facility of its kind in the world and is located at the company's national head office in Burlington, Ontario. Constructed primarily for the Automotive Industry, this new facility will house the latest testing equipment for corrosion resistant coatings, including a complete plating line for North American metal finishers seeking application approvals. For more information on the Tech Center's capabilities, contact Atotech Canada.

Association News

Canadian Paint and Coatings Industry Receives First Draft of New Volatile Organic Compounds (VOC) Regulations

Presentations made at OPA AGM

After two years full of consultation and formal submissions to Environment Canada concerning volatile organic compound (VOC) regulations, the paint and coatings industry has seen results. The federal government announced, this Spring, new more stringent draft regulations to control VOC emission from automotive refinish and architectural and industrial maintenance (AIM) coatings in Canada.

"The paints and coatings industry has worked very hard as an industry over the last twenty years to reduce VOC emissions in paint and coating products. During that time industry has voluntarily reduced AIM VOC emissions from its products by more than 50 per cent," says Jim Quick, President of the CPCA. "These new regulations will give us an additional 30 per cent reduction for a total of 80 percent."

"On the automotive refinish side, industry has voluntarily reduced emissions by more than 40 per cent over 1994 levels," say Quick. "The Government expects the new regulation could reduce 2005 emission levels by an additional 40 per cent."

The draft regulations came as a result of consultations and formal submissions from industry and other stakeholders over the last two years.

"While the industry has done a good job creating and introducing products that are more environment and consumer friendly, we will be significantly challenged to meet the new VOC standards set by government," says Brian Edwards, Chairman of the board of Directors for CPCA. "These new regulations will put Canada among the most stringent jurisdictions in the world with respect to VOC emission controls."

Edwards says, "Canadians should be proud that they have the highest standards of product safety in the world. This is based on a long and successful history of collaboration between government, industry, and consumers." He adds, "Our industry is governed by hundreds of federal and provincial pieces of legislation, as well as hundreds more regulations and self-imposed standards – all of which the paint and coatings industry meets or regularly exceeds."

Quick says, "CPCA and the federal government are working together to ease the burden on industry as a result of the new regulations and to ensure an

Jim Quick, CPCA

Doug Parsons, OPA

Aron Gampel, Scotia Bank

Greg Monette, CCI

orderly compliance."

Quick gave a presentation of the newly drafted regulations at the Annual General Meeting of the Ontario Paint Association (OPA) in April.

OPA Chariman, Doug Parsons gave the following report:

"2007 was a year of change and challenge for the Paint and Coatings Industry, across Canada and particularly in Ontario. Suppliers and Manufacturers have continued to shrink in numbers, as companies merge and purchase. We have recently seen the two largest paint companies in Canada become one. Creating a Coating giant under the Akzo-Nobel umbrella.

We have seen a downturn in many sectors of the Canadian economy. This downturn has particularly hit us in Ontario in our manufacturing sector. The Ontario market accounts for 61 per cent of the Coatings used in Canada. OEM and industrial coatings were adversely affected from decreased manufacturing. The automotive market is slow affecting OEM Coating business in both new cars and part facilities. The automotive recoat market has benefited with consumers keeping their cars longer. This advantage is negated as older cars do get

written-off instead of being repaired after collisions.

The Architectural Coatings market has also seen some weakening. Retail sales were down .7 per cent in February. Housing starts are slowing down hurting the commercial business and the vibrant DIY market is losing its luster. Growth was minimal overall for Architectural Coatings in 2007 in this mature market.

The Board of the Ontario Paint Association met four times in 2007. We had 104 people attend our annual golf tournament August 14, and despite poor weather we had a great event at the Woodbine race track February 29. Both of these events turned a small profit. But, profit is not what the OPA is about. As Government's push forth legislation at the Federal, Provincial and Municipal levels, we need to involve ourselves more as an industry in helping to shape legislation that effects us all in our business.

Voluntary initiatives that are self-controlled would be most desired by all of us, but legislated controls are the norm. To make this work we need to be proactive in Ontario interfacing with Government Officials. The CPCA has come a long way under the direction of Jim Quick in being a key link to industry for the Government.

There is a new slate of Board members to approve. Some of them help us to better represent the Paint and Coatings industry in Ontario; others have the knowledge and experience to help us shape the Government views and future legislation.

I would ask all companies in the Paint and Coating industry to get involved. Let us know what you need and how the Association can help you do your business here in Ontario, elsewhere in Canada and beyond."

The OPA also elected new officers and heard from speakers Aron Gampel, Economist with Scotia Bank presenting his views on iThe State of The Canadian Economyi, the state of Canadian currency and other financial issues; and Greg Monette, Compliance Center Inc. who spoke about iHelping Companies Achieve Regulatory Compliancei and the benefits of his company.

On the Links with TOSCOT

The annual TOSCOT Golf Tournament attracted 118 golfers, June 10, 2008, at Glen Eagle Golf Club in Bolton. Organizers are pleased.

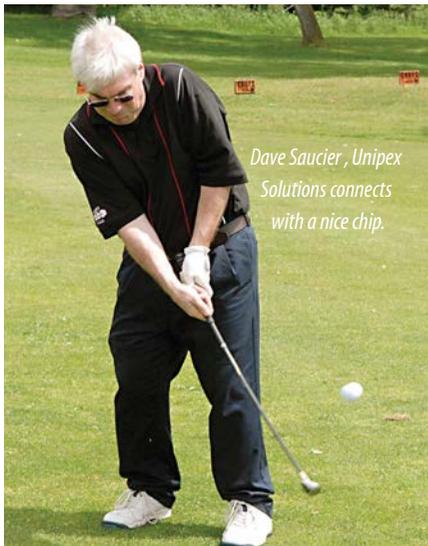

The winning team was David Jackson, Fraser Base, Ryan Reid and Andrew Jackson. Longest Drive (Male): Andrew Jackson and Longest Drive (Female): Kamlaish Mudhar. Sponsors included Brenntag, Precept, BYK, RM Ferguson & Co., Chemroy Canada Inc., Rohm and Haas Canada Inc., Dempsey Tartan Color & Chemical, Inortech Chemie, Inc., Tego Coating Additives & Specialty Resins, L.V. Lomas Ltd., UNIPEX Solutions Canada, Northspec Chemicals Corp. and Univar.

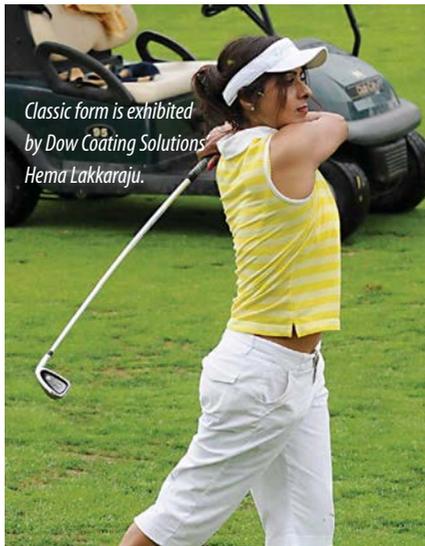

Rich Demarchi, Tristar Coatings launches a long drive.

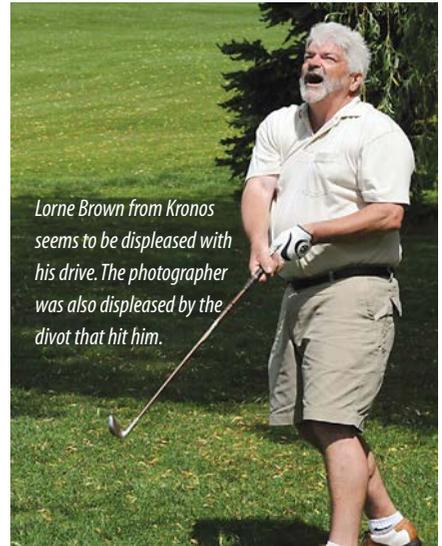

Serif Coatings' Randy Rogers applies body English to his putt.

Dave Saucier, Unipex Solutions connects with a nice chip.

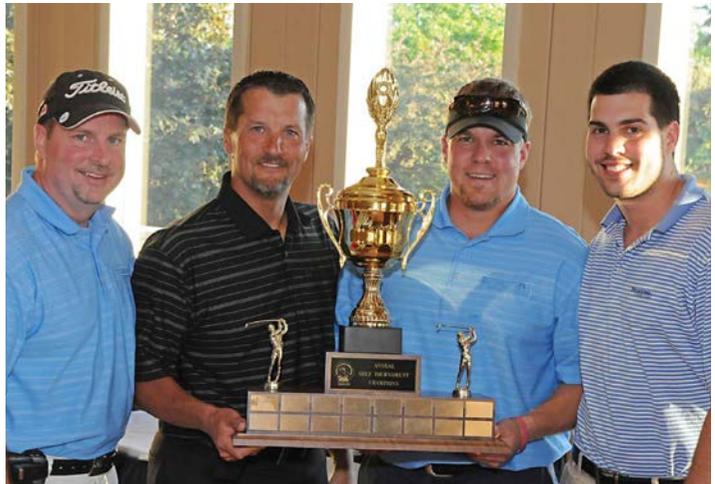

Classic form is exhibited by Dow Coating Solutions Hema Lakkaraju.

Lorne Brown from Kronos seems to be displeased with his drive. The photographer was also displeased by the divot that hit him.

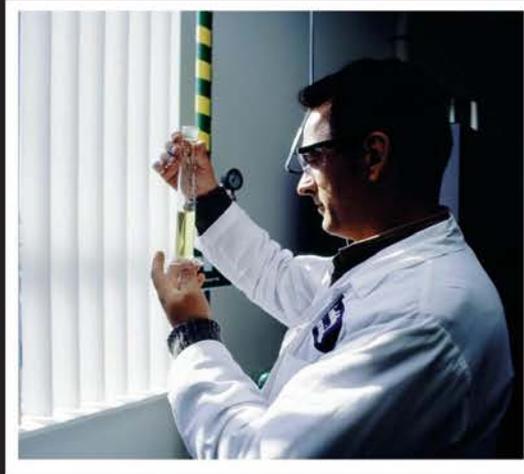

Andrew Jackson, R.M. Ferguson and Kamlaish Mudhar, Univar are presented the Longest Drive prizes by Dave Hazell, Univar and Christina Pross, Industrial Colours and Chemicals.

The R.M. Ferguson Team won Low Gross David Jackson, Fraser Base, Ryan Reid and Andrew Jackson.

Fielding Questions...(#2)

Q: How do I know
if my waste is useable?

A: Call Fielding,
our lab can tell you
how “sweet” it is!

Fielding's state of the art lab is designed to scope out exactly how good your sample is and how to get the most out of every type of material. If you have the “really sweet stuff”, we'll even pay you and come and get it! As one of North America's leading chemical recyclers, we'll take your spent solvents and refrigerants and give them new life by turning them into something useful again... and again and again! Even if your waste isn't “Grade A” as we say, chances are we'll still save you money! Imagine helping the environment and making money at it, now that's sweet! Call Fielding today and have our lab find out how good your waste is - who knows, you may be sitting on a gold mine!

American Coatings Show 2008: A Successful Launch!

With over 330 exhibitors and roughly 5,600 trade visitors, organizers of the American Coatings Show are pleased. Held from June 2-5, 2008 at the Charlotte Convention Center, NC, the combined trade show and conference exceeded all expectations.

“The overall concept of the American Coatings Show had a very positive outcome. We had a lot of support throughout the entire process, which ultimately resulted in a resounding success,” said J. Andrew Doyle, President of the National Paint & Coatings Association (NPCA), in Washington DC. Juergen

Nowak, Publisher, Coatings Division at Vincentz Network (VN), based in Hanover, Germany, agreed wholeheartedly.

Doyle also commented to trade press about the merger between the Federation of Societies for Coatings Technology (FSCT) and the National Paint and Coatings Association (NPCA), explaining that it is official and that the associations will retain their names, and remain two separate legal entities joined under one governing structure.

Andrew Tennant Canada Colors and Stephanie Rose, INEOS Silicas.

Kamlash Mudhar and Eddie Cincinnato, Univar Specialties share a laugh with Dan Goldberg and Frank Gianni of Evonik.

John Roeleveld Don Martyn and Steve Waters from Andicor stop by their principal Huntsman's booth.

Judith Dow Grant 3M and NASCAR 3M Driver Greg Biffle chat about the 3M products going into the construction his new home.

Electrocoat 2008: Where Lean Meets Green Through the Power of E!

The POWER OF E was very apparent throughout the Indianapolis Marriott as e-coaters and other finishers, industry suppliers, and end-users gathered, May 14-16, Indianapolis, IN, for 2 and a half days of intensive technical presentations and discussions.

"It is a great event that is intended to show our appreciation to our members for supporting the association and the industry," states Karen McGlothlin, Association Executive Director and ECOAT 2008 Conference Manager. "It is always well attended by membership and is an important part of our opening events."

The Electrocoat Association will host its Annual Meeting on September 22, 2008 in Indianapolis in conjunction with the Coating 2008 Show.

COATING 2008 On-Line Registration Opens

On-line registration for COATING 2008, the international conference and trade show for the end users of industrial coatings, is now available on the show website: www.thecoatingshow.com.

Set for September 23 – 25, 2008 at the Indiana Convention Center in downtown Indianapolis, COATING 2008 will bring you the latest on green technologies, energy efficiency, cost reduction and quality improvement in both its conference sessions and through its more than 150 exhibitors on the show floor. The three-day conference will feature more than 30 sessions covering everything from liquid to powder coating, electrocoating to IR curing and pretreatment to porcelain enamel. It is sponsored by the industry's leading trade associations: The Powder Coating Institute, The Chemical Coaters Association International, The Electrocoat Association, The Porcelain Enamel Institute and the Industrial Heating Equipment Association's Infrared Div.

FutureCoat! 2008

Taking place October 14–16, 2008 Hyatt Regency McCormick Place, Chicago, IL FutureCoat! is the industry's state-of-the-art technical conference. This key educational event, a complement to the American Coatings Conference, explores the most innovative methodologies and applications shaping the coatings industry with presentations by leading industry experts.

Wood Finishing Symposium Focuses on Lean Technologies and Green Materials at Upcoming IWF Show

Body--A major industry symposium, being held one day prior to the start of the International Woodworking Machinery & Furniture Supply Fair (IWF), will focus on how to switch to more environmentally friendly finishes and technologies, while staying productive and profitable at the same time. Industrial Wood Finishing 2008: From Lean to Green and in Between, will be held Aug. 19, 2008 at the Georgia World Congress Center, home of IWF. The event is being organized by the Centre for Advanced Wood Processing (CAWP) at the University of British Columbia in collaboration with *Wood & Wood Products* magazine and IWF. Becker Acroma, a supplier of industrial water-based wood finishes based in Brantford, ON, is a major sponsor of the event. There are also Canadian presenters such as: Leda Furniture of Toronto, ON, discussing how lean manufacturing principles have recently been applied to the installation and integration of a modern finishing line within the factory and M and J Woodcrafts of Delta, BC, a manufacturer of cabinet doors, describing how it has attained and maintained its reputation as a pioneer in environmental compliance and workplace safety. For information on the event please contact Coral Voss at CAWP (1-866-822-2297) or coral.voss@ubc.ac.

CCAI Call for papers

The Twin Cities Chapter of Chemical Coaters Association International (CCAI) and the Minnesota Technical Assistance Program (MnTAP) at the University of Minnesota, are excited to announce the 7th Minnesota Paint and Powder Coating Expo. The Expo will be held on Thursday, March 19, 2009, at Century College in White Bear Lake, Minnesota (near St. Paul). Currently, the CCAI is seeking people to present on topics related to metal finishing. Abstracts of 250 words or less must be received by October 3, 2008. Address abstracts and inquiries about exhibiting to: Paul Pagel, 2009 Paint Expo, 200 Oak Street SE, Suite 350, Minneapolis, MN 55455-2008 fax: 612.624.3370, phone: 612.624.4638, e-mail: ppagel@umn.edu. The Expo will include a vendor show, hands-on demonstrations and technical seminars. At the last expo, over 400 participants attended the 15 technical seminars and a vendor show featuring over 50 exhibits. In conjunction with the Expo, the Twin Cities Chapter of CCAI will host its annual symposium on March 18 at the Expo location.

Global Polyurethanes Conference

Global producers of polyurethane-based coatings, adhesives, sealants, and elastomers will find a rich variety of technical presentations reporting on important new environmental technologies, novel chemistries and improved materials performance at the Polyurethanes 2008 Technical Conference, sponsored by the Center for the Polyurethanes Industry (CPI) of the American Chemistry Council. This year's Conference will include more than 100 technical papers and poster presentations, educational seminars, the Annual Innovation Awards, and a Polyurethane Professional Development Program. The Conference will be held September 29 through October 1 at the Marriott Rivercenter in San Antonio, TX.

Company news

Dow Buys Rohm and Haas

On July 10, 2008, Dow and Rohm and Haas announced a definitive agreement, under which Dow will acquire all outstanding shares of Rohm and Haas common stock for \$78 per share in cash, a total \$15.4 billion. The acquisition of Rohm and Haas will make Dow the world's leading specialty chemicals and advanced materials company, combining the two organizations' best-in-class technologies, broad geographic reach and strong industry channels.

The transaction marks a decisive move in Dow's transformation into an earnings growth company with reduced cyclicality. Last December, Dow announced a joint venture with Petrochemical Industries Company of the State of Kuwait (PIC). With the collective impact of these two deals, performance products and advanced materials will represent 69 percent of Dow's total sales, on a 2007 pro forma basis, compared with 51 percent prior to these transactions.

Financing for the acquisition includes an equity investment by Berkshire Hathaway and the Kuwait Investment Authority in the form of convertible preferred securities for \$3 billion and \$1 billion respectively. Debt financing has been committed by Citi, Merrill Lynch and Morgan Stanley who acted as financial advisors on the transaction.

"The acquisition of Rohm and Haas is a defining step in our transformational strategy to shape the "Dow of Tomorrow" – a high value, diversified chemicals and materials company, creating the largest specialty chemicals company in the United States with a leading global position in performance products and advanced materials," Andrew N. Liveris, Dow chairman and CEO, commented.

Rohm and Haas chairman and CEO Raj L. Gupta stated, "When this transaction is completed, Rohm and Haas will be a critical component of the New Dow, the world's preeminent chemical company and will be aligned with a forward-looking US-based enterprise, committed to investing in research for new technology solutions to many of the most pressing societal needs. We believe that by becoming a part of Dow, we secure a brighter future and greater growth prospects for our employees, consistent with the vision of our founders to remain a high-quality supplier of innovative technology and solutions."

Dow expects the transaction to be meaningfully accretive to earnings in the second year following completion, with pre-tax annual cost synergies expected to be at least \$800 million per year. Key areas of cost savings include increased purchasing power for raw materials; manufacturing and supply chain work process improvements; and the elimination of redundant corporate overhead for shared services and governance.

Ashland to Acquire Hercules

Ashland Inc. and Hercules Inc. have entered into a definitive merger agreement under which Ashland will acquire all of the outstanding shares of Hercules for US\$18.60 per share in cash and 0.093 of a share of Ashland common stock for each share of Hercules common stock. The total transaction value is approximately \$3.3 billion, or \$23.01 per Hercules share based on Ashland's July 10 closing stock price and including \$0.7 billion of net assumed debt. The transaction, which would create a major, global specialty chemicals company, is expected to close by the end of calendar 2008.

Specialty Polymers Group to be Integrated Into Existing AkzoNobel Businesses

AkzoNobel is currently integrating the former ICI's Specialty Polymers Group into other Specialty Chemicals business units within the company. As a result, Elotex will become part of AkzoNobel Functional Chemicals and Alco and Personal Care will join AkzoNobel Surfactants, which will be renamed AkzoNobel Surface Chemistry.

New Distributor for Everlight

Everlight Chemical Industrial Corporation, one of the top UVA's and HALS producers, is proud to announce effective July first, Inortech Chimie Inc appointment as its exclusive distributor for the Canadian Market. The partnership of Everlight's know how and Inortech's technical expertise, well equipped laboratory and their commitment to the Canadian coating, plastic, ink and adhesives markets, will provide a strong alternative to Everlight clients.

Clariant's Pigments and Additives Division Expands Distribution Chain

Clariant, Coventry, RI, has named four new distributors to handle various pigment and additive products in North America.

P.T. Hutchins Co., headquartered in City of Industry, CA, will serve Clariant customers throughout the United States, carrying a comprehensive range of Clariant pigment and additive products.

Clariant's aluminum anodizing products are now available through two distributors. Reliant

GFS Awarded Contract with Lockheed-Martin

Global Finishing Solutions (GFS) has been awarded a contract to produce eight paint booths for the production line of the Joint Strike Fighter (F-35 Lightning II), the largest ever military contract to be awarded to Lockheed-Martin Aerospace. Lockheed built a modern new plant at Fort Worth, Texas to assemble the fighters. The paint booths were manufactured at the Osseo, Wisconsin facility of GFS.

Lockheed will produce over 100 aircrafts a year at this facility and they will be used by at least nine of Canada's allies in other countries. Parts for the aircraft assembly are fabricated at many countries across the world. The booths are 62' wide x 77' deep and 25 ft high. Numerous wall and ceiling penetrations allowed for sensible installation of utilities such as air, breathing air, and others.

Korzite Acquires K. Bottschen

Korzite Coatings Inc., Guelph, ON, has acquired certain assets owned by K. Bottschen Mfg. Co. Ltd. of Brampton.

Botschen (also known as KB Coatings) will be closing its premises and all production will be relocated to Korzite's manufacturing site in Guelph.

"Botschen has a strong and growing reputation as a supplier of primers and coating mainly targeted at steel and industrial manufacturing. Our product offering will be strengthened as a result of this merger of interests and allow Korzite to focus more on regulatory compliant technologies," says Dan Thomas, General Manger of Korzite Coatings Inc. "Korzite will now be better positioned to support our expanding customer ase which serves the industrial paint market throughout North America. We see, as an additional strength, that both organizations are registered to the current ISO quality standard."

L.V. Lomas Launches New Third Party Logistics Service

L.V. Lomas, an industry leader in Canadian chemical distribution has announced the launch of a new third party logistics service targeted to assist

both chemical manufacturers and finished goods manufacturers with packaging and transportation of their products. L.V. Lomas has earned a top notch reputation in the industry for being able to deliver a wide variety of chemicals to a diverse group of clients, who all have unique needs. The plan is to utilize their state of the art custom packaging processes, cross Canada warehouses and their fleet of trucks, trailers and rail cars to deliver products for their principals and clients. L.V. Lomas is equipped to provide the following services:

- Warehousing (climate controlled, 24 hr security monitoring)
- Liquid blending and packaging (including totes and drums)
- Distribution and freight services
- Bagging of multiple size packages including Super sacs
- Re-pack services (container de-stuffing, palletizing & stretch wrapping)
- Assembly of Point of Sale displays and kitting
- Bulk transloading (Rail tank cars and tank trucks)
- Bulk liquid steaming - Rail tank cars, tank trucks and isotainers
- Fulfillment / Pick & pack
- Web-based inventory visibility and online reporting

L.V. Lomas provides customized services tailored to specific requirements.

Canada Colors Moving in the Right Direction

Effective in May 2008, Canada Colors and Chemicals (CCC) Sales is now operating out of a new building at 6605 Hurontario Street, Suite 400, Mississauga, ON, L5T 0A3, Tel: 905-404-6900, www.canadacolors.com.

In additon to this move, CCC's corporate employees in Executive, Credit, Accounting, Human Resources and Finance will also be relocating to a different location mid-year. The Customer Service Department will remain in its current location in Brampton.

Minister of Environment Announces Fielding an Environmental Leader

Ontario Minister of the Environment, John Gerretsen, made the announcement recently at the Green Living show in Toronto that Fielding Chemical Technologies Inc. has been accepted into the Ontario Environmental Leaders Program.

Fielding continues to demonstrate their

environmental leadership by committing to a broad range of reduction targets that go beyond compliance and address Ministry priorities, including reducing emissions of smog-forming pollutants, using less energy and converting hazardous waste materials into useful products.

"In its business, Fielding was first in the world to be registered to ISO 14001 and first in the world to be verified to Responsible Care," says Fielding Chair and CEO Ellen McGregor.

AkzoNobel Sells Canadian Paint Brands

AkzoNobel, AMSTERDAM, the Netherlands, has agreed to sell its Para and Crown Diamond decorative paints brands in Canada to General Paint Corp. The sale is in line with the commitment package, which was arranged with Canadian authorities in connection with AkzoNobel's acquisition of Imperial Chemical Industries plc (ICI) in January. The deal was completed on June 30.

General Paint is a leading decorative coatings manufacturer in Canada. Completion is subject to certain customary conditions and the approval of the Commissioner of Competition. No financial details were disclosed.

The sale of Para and Crown Diamond, which has a similar name, but is in no way connected to AkzoNobel's Crown brand, is one of three divestments the company agreed to in connection with the ICI acquisition. The divestment of the Crown business in the UK and Ireland is progressing, while headway is also being made on the sale of the DeKeyn® and some other brands in Belgium.

Dow Closes Plant

Dow Reichhold Specialty Latex has announced the permanent closing of the company's manufacturing plant located in Chickamauga, Georgia. The closing will be effective on August 31, 2008. The facility employs 57 people. Products currently manufactured in the facility will be transferred to other manufacturing sites. "This rationalization of production capacity is necessary to bring our capability in line with current market demand," said Jeffrey Welker, President of Dow Reichhold.

Henkel Announces New Auto Alignment

Henkel, Madison Heights, MI, has announced the reorganization of its automotive division. Business groups under the new structure include: Automotive Coatings, focusing on core coating technologies including Bonderite, Aquence and e-coat products; Body Assembly, focusing on providing an integrated approach to addressing customer needs in NVH,

structural and sealing solutions; Chassis and Exterior Components, focusing on the traditional frame and chassis segment with additional focus on steering and ride control, jobbers and coaters, wheels, brakes, and exterior accessories; and Powertrain, focusing on engine and axle assemblies, transmissions, and powertrain control modules. Henkel will also continue to provide engineering solutions to the complete vehicle.

BYK completes REACH pre-registration within only four days.

BYK is one of the first companies in the chemical sector to complete the official pre-registration within the framework of the REACH regulation.

Only four days after the start of the pre-registration phase on June 1, 2008, BYK was able to complete the complex undertaking as early as June 4. "For our customers this means maximum and earliest possible certainty that our products remain available as normal," Dr. Gerald Kirchner, Head of Product Development at BYK, explains.

REACH, the European chemicals regulation, has been in force since June 1, 2007.

It implies registration, evaluation and authorization of produced and imported chemicals at the new European chemicals agency ECHA, based in Helsinki. This allows all the relevant information about the chemicals found on the European market to be collected and assessed centrally.

Wagner Open House Demonstrates Commitment to Finishing Industry

Wagner Industrial Solutions Open House on May 14, 2008, attracted over a hundred system integrators, suppliers, associates and trade press who toured the liquid and powder coating facilities were provided with a first-hand opportunity to try out Wagner's newest products. From fully-automated powder coating in the SuperCube to the unparalleled flexibility of a manual PrimaCell, each visitor got a chance to participate in live liquid and powder coating demonstrations.

Wagner moved into the 55,000 square foot Elgin Illinois facilities early this year and began construction of two, fully equipped, applications labs to help train customers and prove the benefits of their technology.

Bayer Honored For Quality Initiatives

Three teams from Bayer took home honors at the American Society for Quality's (ASQ) World Conference on Quality and Improvement. The ASQ, the world's leading authority on quality, strives

to improve business results and create better workplaces and communities worldwide. This year's conference also featured a keynote address by Bayer MaterialScience LLC (BMS) President and CEO Gregory S. Babe.

DEACOM ERP Software Website Garners Gold in Creative Competition

Deacom, Inc., producer of the DEACOM Integrated Accounting and Enterprise Resource Planning (ERP) Software System for batch process and mixed-mode manufacturers, has received the Gold Award in the "Web Site" category of the 2008 Hermes Creative Awards. The Hermes Creative Awards is an international competition that recognizes professionals involved in the concept, writing, and design of traditional and emerging media. The 2008 Hermes Creative Awards were given to the top performers among 4,000 entries as judged by the Association of Marketing and Communication Professionals (AMCP), an international organization consisting of several thousand media professionals. Entries came from corporate marketing and communication departments, advertising agencies, public relations firms, design shops, production companies, and freelancers.

In May 2008, Deacom held its annual user conference at the Top of the Tower in Philadelphia, PA. Also in May the company launched Deacom University, an accredited program designed to train users of all levels in each area of the DEACOM System. Held monthly at Deacom headquarters in Wayne, PA, each Deacom University course offers continuing professional education (CPE) credits through the National Association of State Boards of Accountancy (NASBA). Deacom University will provide students with conceptual and practical knowledge in specific DEACOM functionality over a two-day course period.

Dow Introduces Dow Coating Solutions

The Dow Chemical Company has introduced a new market-facing business unit, called Dow Coating Solutions, to customers across all geographies and aspects of the industry. Dow Coating Solutions focuses exclusively on the needs of coatings formulators and leverages many resources within Dow, including more than a dozen different product chemistries, a highly-trained and diverse R&D staff and an unparalleled global commercial and supply infrastructure.

"From house paints to industrial pipeline coatings, our goal is to continually enable new formulations with higher performance levels and

lower environmental footprints," George Hamilton, president of Dow Coating Solutions explained. "Accomplishing this constant innovation can be done through chemistry-based solutions, and the formation of Dow Coating Solutions now gives customers of all sizes better access to the raw material knowledge, chemistries and reliable supply they need to compete in this complex marketplace."

To better accomplish this goal, Dow Coating Solutions has developed structured market facing teams dedicated to three primary groups of formulators. They are companies serving the architectural coatings; transportation and corrosion protection; and industrial coatings industries. Within each of these three areas, Dow Coating Solutions has assembled the R&D, sales and marketing experts needed to help our customers succeed.

At the same time, the company is taking a product-agnostic approach to developing and delivering innovations based on customer and industry needs. These efforts currently focus on four "innovation themes," specifically: reducing environmental impact; improving environmental durability (e.g. UV stability, corrosion resistance, dirt pickup resistance), reducing application and life cycle costs; and enabling "smart" coating functionality.

Atrium Innovations' Active Ingredients and Specialty Chemicals Division strikes out on its own and becomes UNIPEX Group

UNIPEX Group has acquired the Active Ingredients and Specialty Chemicals Division of Atrium Innovations Inc as previously announced on April 4, 2008. The Companies of the AI & S Division will be united under one banner: the UNIPEX Group. The UNIPEX Group will carry on under the following:

Unipex Innovations, which will include the worldwide operations for development, manufacture and marketing of proprietary active ingredients aimed at the cosmetic industry (formerly Atrium Active Ingredients Division and Institut Européen de Biologie Cellulaire – IEB).

Unipex Solutions – France, which will incorporate the distribution companies for active ingredients, specialty chemicals and services in Europe (formerly Unipex, Chimiray and Siricie-Iris).

Unipex Solutions – Canada, which will encompass the distribution activities for active ingredients, specialty and base chemicals and services in Canada (formerly MultiChem and Amisol).

Charles Boulanger, President and Chief Executive Officer of UNIPEX Group says there is no change in

phone numbers, faxes, addresses, emails, customer services and the people customers are dealing with on a daily basis.

Michelman Acquires Hydrosize Technologies

Michelman, Cincinnati, OH, announced June 15, 2008, the acquisition of Raleigh, North Carolina based Hydrosize Technologies, Inc., a manufacturer of state-of-the-art coatings including sizings, film formers, fixatives, binders as well as resins for the coating and composite industries.

Andy Brink

Key to the acquisition, Hydrosize gives Michelman a waterborne polyurethane sizing technology designed specifically for the fibers and composites market. The polyurethane dispersion technology will complement Michelman's existing line of polyolefin-based solutions, and will be developed for applications in other markets including coatings and packaging.

Hydrosize carries its own polyolefin line, which will strengthen and supplement Michelman's existing offering. The company also boasts the world's only solvent free, high temperature sizing for use in advanced composites.

Hydrosize was co-owned by husband and wife, Andy and Heather Brink. Dr. Andy Brink has joined the staff of Michelman to ensure a successful transition, and has been named Business Development Manager, Fibers & Composites. He will work with the combined customer groups, and bring his wealth of marketing and technical expertise to Michelman's growing fibers & composites business.

New Distribution Lines for Andicor

Andicor Specialty Chemicals Corp, Mississauga, ON, effective June 16, 2008, became representatives of Alberdingk-Boley, Inc. (ABI) of Greensboro, NC, across Canada for their full range of water-based acrylic and styrene-acrylic emulsions and polyurethane dispersions for wood, concrete, and metal coatings. Other specialty products available from Alberdingk-Boley include opaque polymers, UV cross-linkable dispersions, and castor oil-based polyols. ABI's product line includes the MeadWestvaco line of emulsion polymers acquired in 2006. Effective June 26, 2008, Andicor represents U.S. Bronze Powders, Inc. of Flemington,

NJ, across Canada for their full range of metallic (bronze, copper, aluminum, zinc, and stainless steel) pigments and heatset and sheetfed metallic offset inks. For waterborne applications, U.S. Bronze offers the innovative Aquafoil line of bronze and aluminum pigments, delivering superior brilliance in inks, paint, and coatings.

People on the Move

New at Northspec

Northspec Chemicals Corp., Toronto, ON, announces the addition of Joe Loncar to the Marketing and Sales Group as Product/Account Manager. Loncar will be based in Ontario and will be responsible for key customers in the coatings, construction, floor care, and related areas in Ontario as well as managing Northspec's pigment supplier lines.

A graduate from York University in Chemistry, Loncar joins Northspec with over 20 years industry experience in coatings development, and chemical technical sales roles.

Erie Powder Welcomes Mike Kurceba

Erie Powder Coatings is pleased to announce that Mike Kurceba has joined our sales force. Many powder users will know Mike, as he has many years of experience selling powder coatings and equipment. He brings a broad range of experience to Erie which we know will assist our company and our customers. Mike will be developing new business for Erie Powder, and covering the central and western Ontario regions.

Mike Kurceba

Changes at Cefla Canada

Cefla Finishing Canada is pleased to announce that Stephen Richardson joined the sales team as a Regional Sales Manager. Steve will take on the

Alex Dinucci

Stephen Richardson

responsibility of sales for Central Canada (Alberta, Saskatchewan and Manitoba). Steve comes to Cefla with an extensive sales background which he acquired in the woodworking machinery industry.

Cefla also welcomes Alex Dinucci as a Laboratory Operator; he will be responsible for the Montreal testing laboratory. Alex has an extensive technical / application background in finishing which he acquired over a period of 7 years working on an automatic Cefla finishing line.

Steve and Alex will be a great value for the continuous growth and success of Cefla Finishing Canada.

Changes at Troy Corporation

Charles Malloy

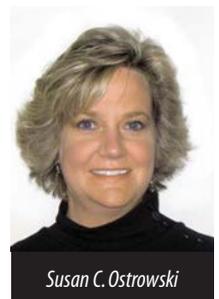

Susan C. Ostrowski

Troy Corporation announces that Charles Malloy has joined Troy Corporation as Regional Sales Manager, reporting to Joseph Galimi, Director, U.S. Sales. Malloy's focus will primarily entail sales management of east coast sales region as well as strategic national accounts for Troy Corporation. In this capacity he will coordinate business initiatives between sales, marketing, development and operations.

Susan C. Ostrowski has joined Troy Corporation as Director of Biocide Products Marketing USA, reporting to Mark Gwillim, President/Chief Operating Officer.

In her role, Ostrowski will lead all marketing efforts of the Troy USA biocide business.

Wendy Koziel has joined Troy Corporation as Regional Sales Manager, reporting to Joseph Galimi, Director, U.S. Sales. Koziel's focus will primarily entail sales management of Ohio-based strategic national accounts for Troy Corporation. In this capacity she will coordinate business initiatives between sales, marketing, development and operations.

Susan C. Ostrowski

DuPont Coating Solutions Engineer Appointed Chairman of International Task Group

Kuruvila Varughese, global engineering manager, DuPont Coating Solutions was elected recently as chairman of the National Association of Corrosion Engineers International (NACE) Task Group to revise and rewrite NACE RP0395-99 Specification "Fusion Bonded Epoxy Coating of Steel Reinforcing Bars."

The group will focus on revising the specification to include the latest developments in coating materials and application techniques of epoxy systems for rebar used for cement structures, bridges and freeways. Varughese is currently serving as the chairman of NACE RP0394-2002 and vice chair of technology groups: Developing Specifications for Protecting of Underground Pipelines for oil and gas (STG TG 336 and TG-337).

In addition to his appointment, Varughese is actively involved in International Standards

Organization (ISO) coating specification development committees.

Kuruvila Varughese

New Pres and CEO at Motoman

Steve Barhorst is the new President and Chief Operating Officer of Motoman Inc., one of the largest robotic solution providers in North and South America. Barhorst succeeds Craig Jennings, whose departure after nearly 19 years comes at a time in which Motoman is shifting to a global strategy designed for aggressive growth.

Barhorst joined Motoman as Vice-President and CFO in August 2000 and became Senior Vice-President and CFO in March 2004. In 2005, Barhorst assumed additional responsibility for leading Motoman's Standards & Logistics Group, which represents approximately 50 percent of the company's business. Barhorst's extensive management and finance background includes positions as Vice-President and CFO for Dolly, Inc.; Controller and Assistant Treasurer for Fidelity Health Care, Inc.; and Audit Manager for Ernst & Young. He

Steve Barhorst

has a Bachelor of Science degree in Accounting from Miami University of Ohio (1985).

IAPA Announces New Chair of Board Of Directors

The Industrial Accident Prevention Association (IAPA) is proud to announce the appointment of Lance Novak of Canadian Standards Association (CSA), as Chair of its Board of Directors for 2008-2009. Novak assumed the position from Jeffrey Mitchell, partner at the firm of Borden Ladner Gervais LLP, at the organization's Annual General Meeting held on May 29, 2008.

"My employment at Canadian Standards Association and my involvement with the IAPA Board of Directors has led me down very similar paths," said Novak. "Both organizations share similar mandates to enhance health and safety and improve the quality of life for Canadians by keeping people safe. I have always been passionate about this cause and I am honoured to be able to take my role to the next level."

Outgoing Chair Jeffrey Mitchell was thankful for his term, saying, "This has truly been a great year for IAPA and I have been very proud to be a part of it. The work completed with the volunteer restructuring, led to a volunteer group that is both vibrant and fully aligned with IAPA's strategic vision; and is just one of the many accomplishments that demonstrates the significant role IAPA plays in driving home the importance of health and safety."

Pricing updates

Polymer price increase

Due to continuing and unremitting escalation of raw material prices, energy, and other costs, Dianal America, Inc., of Pasadena, TX, is raising prices on its polymers. Effective July 14, 2008, Dianal will raise prices 7 per cent to 12 per cent on grades of acrylic and styrene/acrylic polymers.

Troy Announces A Global Price Increase On Preservatives And Additives

Troy Corporation has announced a global price increase of up to 20 per cent effective July 1, 2008 or as contract allow, for all products. According to Troy President and COO Mark Gwillim, "The price increases are driven by escalation in the costs of key raw materials, energy, transportation and packaging." These price increases will vary by product.

Eliokem announces North American price increase

Eliokem, Akron, OH, announces a price increase for all its coatings resins, Pliolite, Plioway, and Pliotec in the North American market. This price increase of up to 5 per cent depending on the grade and/or as contracts allow will be effective on August 4th, 2008. The company says this price increase had to be implemented to partially offset the unprecedented rise in the cost of raw materials, energy, and freight costs associated with producing these products.

Dow Reichhold Increases Price For Latexes Sold in North America

Dow Reichhold Specialty Latex has announced a price increase of 15 per cent, or a minimum of U.S. \$0.10/wet pound, for all specialty latex products sold in North America, with the exception of products sold for glove manufacturing. The increase will be effective on June 15, 2008, and is in addition to all recently announced increases.

Sartomer Increases Monomer and Oligomer Prices

Global specialty chemicals manufacturer Sartomer Co. has increased the price of its acrylate and methacrylate monomers and oligomers 6 to 12 per cent in the Americas region, effective July 1, 2008. Increases will vary based on the product line.

Lucite International Announces Price Increase

Due to escalating costs in raw materials and transportation, Lucite International has announced a 9 per cent price increase on Elvacite acrylic resins effective June 30, 2008, or as contracts allow.

Prismatic Powders Price Increase

Prismatic, White City, OR, has announced a 5 per cent price increase on many products in its Prismatic Powders line.

Dow Epoxy Takes Action to Address Unacceptable Margins

Dow Epoxy, a business unit of The Dow Chemical Co. (Dow), has announced plans to raise prices in North America and other world regions as necessary, in response to the current climate of rising costs and shrinking margins.

The business is currently meeting with customers to discuss market issues and upward price movement, primarily driven by rising costs. On the cost side, Dow has incurred new hydrocarbon and

energy costs of greater than \$2 billion in the first quarter of this year alone and an additional \$665 million so far in the second.

OMNOVA Solutions Increases Price of Specialty Chemicals

OMNOVA Solutions' Specialty Chemicals business has increased prices of up to \$0.06 per wet pound for acrylic, styrene acrylic, vinyl acrylic and vinyl acetate emulsion polymers. The increase is for all specialty markets and is in addition to increases announced earlier this year. This announcement is necessitated by the unprecedented escalation of the costs of energy, freight and key raw materials.

Evonik Raises Price of Polymers and Monomers

Evonik Industries AG, Germany, has raised prices of its entire range of high-performance polymers and monomers by an average of 10 percent, depending on region, product type and invoice currency. Customers will be informed of specific price increases by their regional representatives.

EPS Increases Price of Solvent-Based Resins

As a result of sharp increases in the price of solvents and other key raw materials, EPS has announced an increase for all solvent-based resins that became effective June 1, 2008. Increase amounts will be up to 7 cents per pound depending on product class.

DSM to Raise Price of Polyester Powder Coating Resins

DSM has announced it will raise prices for its Uralac polyester powder coating resin range sold in North America by \$0.05/lb. High demand and oil-related price increases in the feedstocks part of the PCR value chain have resulted in price hikes for terephthalic acid, adipic acid and trimellitic anhydride. No short-term relief is expected due to continued high prices for base feedstocks.

AkzoNobel Powder Coatings to Increase Prices

AkzoNobel Powder Coatings, Nashville, TN has announced that, in response to escalating energy cost, transportation cost and certain raw material increases, it will raise prices by as much as 15 per cent for certain products. The exact price increase will vary by product depending on its exposure to increases of energy, transportation and raw material cost.

BASF Announces Resin Product Surcharge

BASF Resins, Wyandotte, MI has announced that it has implemented a surcharge on all resins products sold to all North American domestic and export customers effective July 1, 2008. The surcharge will be \$0.097 per pound for solid resins and polyols, and \$0.049 per pound for emulsions, solutions and additives. This surcharge is in addition to the previously announced and implemented resins price increase effective May 1, 2008.

New Pricing for CCP Coatings Resins

Effective on orders shipped on or after July 1, 2008, or as contracts allow, Cook Composites and Polymers (CCP) has implemented a 5 to 12 per cent price increase for all coatings resins products. According to CCP's Coatings Division Vice President Marcel de Wolf, the change is driven by increased raw material and energy costs.

Ciba Implements Global Price Increases

Ciba has announced substantial sales price increases across all product ranges with immediate effect, some in excess of 20 per cent.

Cray Valley Implements Sales Control for Norsolene Resins

Cray Valley is implementing sales control on its Norsolene A series and S series hydrocarbon resins manufactured in its Channelview, TX, facility, effective immediately. The change does not affect the company's Norsolene W series resins and only applies to customers in the Americas. Citing reduced use of heavy feedstocks in the olefin industry, Cray Valley will limit customers serviced by the Channelview site to 100 per cent of their average purchase over the prior six months. Additionally, Cray Valley will no longer fill orders less than a full truckload. Customers wishing to purchase smaller amounts are asked to contact an authorized distributor.

Cytec to Increase Prices

Cytec Industries Inc. has increased the prices of selected UV/EB-curable oligomers, monomers, photo-initiators and VANCRYL acrylic resins shipped in the Americas on or after June 23, 2008, or as contracts allow.

Monomers will increase between 10 to 20 per cent, oligomers will increase between 4 to 20 per cent, and VANCRYL acrylic resins will increase between 6 to 10 per cent.

Dow Coating Solutions Latex Increase

Dow Coating Solutions, a market-facing business of The Dow Chemical Co., is increasing the off-list prices of its latex emulsion products. Effective June 1, 2008, for all North American customers, Dow has increased the price by U.S. \$0.04/wet pound for all UCAR™ acrylic, vinyl acrylic, styrene acrylic and styrene butadiene latexes, EVOCAR latexes, NEOCAR acrylics and latexes, and UCAR POLYPHOBE rheology modifiers.

This increase applies to all market segments, including architectural and industrial coatings, construction products, adhesives and sealants, and traffic coatings.

DOW Raises Price of VAM

The Dow Chemical Co. (Dow) has announced that, effective July 1, 2008, or as individual contract terms allow, it has raised the price of vinyl acetate monomer (VAM) in all regions of the world.

VAM prices have increased by U.S. \$0.02 per pound in North America and by U.S. \$40 per metric ton in all other regions of the world. This is in addition to the U.S. \$0.04 per pound (U.S. \$90 per metric ton) increase announced by Dow on June 2, 2008.

Dow Oxygenated Solvents to Raise Prices

The Dow Chemical Co. announced that it will raise both list and off-list prices on a number of its oxygenated solvents products in North America effective July 1, 2008, or as contracts allow. The price increases vary from \$0.03 - \$0.08.

DOW Increases Price of Vinyl Acetate Monomer

The Dow Chemical Co. (Dow) announced that effective immediately or as individual contract terms allow, it will raise the price of vinyl acetate monomer (VAM) in all regions of the world. The increase is in response to the current climate of unprecedented energy and raw material costs.

VAM prices will increase by U.S. \$ 0.04 per pound in North America and by U.S. \$90 per metric ton in all other regions of the world.

DuPont Titanium Technologies Increases Prices

DuPont has announced that prices for its Ti-Pure titanium dioxide (TiO₂) products will increase by July 1, 2008, due to rapid and substantial increases in the costs of energy, raw materials and transportation. While specifics will vary by region, customers can expect the rapid implementation of

previously announced price increases, additional increases and, in some geographies, energy-related surcharges.

Dura Chemicals Inc. Announces Price Increase

Dura Chemicals Inc., a producer of high-quality metal organics, has announced that effective June 16, 2008, the company has increased the price of its metal organic products by 4-15 per cent.

Evonik Announces New Prices for VESTAGON®

Evonik Industries AG, Business Unit Coatings and Additives, has announced a price increase for VESTAGON PUR powder coatings crosslinkers and VESTAGON EP-R 4030 in NAFTA by 8 per cent, effective July 1, 2008. This increase includes all standard cross-linkers, matte polyurethane products and the newest cross-linking system developed for low-temperature cure PUR.

OMNOVA Solutions to Increase Price of Specialty Chemicals

OMNOVA Solutions' Specialty Chemicals business has announced a price increase of up to \$0.20 per dry pound for all styrene butadiene-based emulsion polymers. The increase, which is in addition to all previously announced increases and surcharges, is effective June 15, 2008, for all specialty markets including coatings, tape and adhesives, nonwovens, floor care, and construction. The increase is necessitated by the continuing escalation in oil-related costs including freight, energy and petroleum-based chemical feedstocks.

Sun Chemical Performance Pigments Increases Prices

Due to a dramatic spike in raw material, energy and transportation costs, Sun Chemical Corp.'s Performance Pigments Division, Parsippany, NJ has increased global pigment prices on average by 10 to 30 per cent effective July 1.

This price increase is in addition to the price increases announced in February 2008, and will affect pigments in all forms, including dry, preparations and flushes.

Tronox Announces TiO2 Price Increases

Tronox Inc., on behalf of its subsidiary companies, says prices for all TRONOX TiO2 grades sold in North America (United States and Canada) will increase by U.S. \$0.06 per pound, effective July 1, 2008, or as contracts allow. This increase is in addition to the price increases announced in October 2007, January 2008 and June 4, 2008.

Wacker Polymers Adds Surcharges for Airflex Dispersions

Effective in June, 2008, Wacker Polymers, L.P. expanded the focus of its current surcharge program and increase surcharges by up to \$0.05 per wet pound for vinyl acetate ethylene copolymer and vinyl acetate vinyl chloride copolymer dispersions sold in the Americas region. These products are sold by the company under the Airflex trademarks. This action is in addition to a recently announced surcharge driven by the sudden increase in the cost of methanol, which remains at elevated levels. This additional surcharge is necessary to offset significantly rising costs for natural gas, transportation and other key raw materials.

New Products

Cytec New Coating Resins

Cytec has introduced many new low VOC coating resins and additives to help meet the current needs of formulators. New products include: Waterborne resins for low VOC metal, architectural, and concrete floor coatings; A new pigment grinding resin for high-performance coatings; water-based UV curable PUDs for indoor and outdoor wood primers and coatings; superdurable powder coating resins and additives for exterior applications and new energy-curable nanocomposites for plastic hardcoats.

Celanese Introduces EcoVAE Emulsions for Low to No VOC, Eco-Friendly Paints

Celanese Emulsions Polymers has introduced a new vinyl acetate/ethylene (VAE) emulsion technology specially designed to facilitate the manufacture of high quality, eco-friendly paints for North America. Called EcoVAE (pronounced ee-coe-vay), this new line of products was created to meet both the regulatory requirements for lower VOC limits and growing consumer demand for more environmentally sound, low odor products. The first product in the new line, EcoVAE 401, offers specific advances for interior paints in wet edge, touch-up performance, scrub resistance,

as well as the new brand's hallmark low odor and emissions. EcoVAE is synthesized to be free of alkyl phenol ethoxylates (APE) and will assist coatings manufacturers, architects and the construction industry in achieving 'green' certifications. www.celanese.com/ecovae

NEW, COMPACT NORDSON EXCEL 3000

The new compact Excel 3000 Powder Spray Booth from Nordson Corporation offers big performance in a smaller space. It features plug-and-spray technology for quick installation and start-up, a compact booth that allows for faster color change, and a low base height for easy access. Available in 6-ft, 10-ft and 15-ft bases as standard.

EXEL Airmix

EXEL North America is pleased to announce the 20:15F - The Next Generation of Airmix Pumps designed for water and solvent based paint with viscosity from 500 to 1000 cps materials. These pumps are designed with the exclusive leak-free Flowmax fluid section for total reliability. www.exel-na.com

New PosiTector 6000 PA2 Feature

The redesigned PosiTector® 6000 Coating Thickness Gage from DeFelsko Corporation now offers an advanced SSPC PA2 feature set in memory models. This new feature makes it easier than ever to determine if film thickness over an extended area conforms to user-specified minimum and maximum levels. www.defelsko.com

New at BASF

BASF has launched its new Laromer PR 9052 UV-curable, high performance resin in the United States. With outstanding abrasion and scratch resistance, Laromer PR 9052 is ideal for creating highly durable wood coatings. Laromer PR 9052 is very easy to formulate and can even reduce production complexity. Also making its U.S. debut is BASF's new photoinitiator, Lucirin TPO-XL, which provides UV curing of even thick, pigmented films. Its liquid form makes it very easy to process and its very low yellowing allows it to be used in pastel and white UV-curing coatings.

AEROSIL and AEROXIDE Alu C for Powder Coatings

Evonik Degussa's AEROSIL fumed silicas and AEROXIDE Alu C (fumed Aluminium Oxide) are designed to improve the manufacturing process, transfer efficiency, fluidization and performance of powder coatings. This year at Coatings 2008 a new, high surface area Alumina grade will be introduced VP Alu 130, with a surface area of 130 m²/g. Pigment carbon black and color preparations will also be featured which meet a variety of color requirements.

New Ball Valves

Plast-O-Matic Valves Inc. has expanded its line of thermoplastic ball valves to include new, larger pipe sizes. The new valves are designed for 3" and 4" piping. These rugged, true-union valves are available in PVC, CPVC, PVDF and polypropylene. Standard seals are EPDM or FKM (Viton), and PTFE seats. The new sizes complement the original True Blue Ball Valve line of 1/2" through 2" valves. Piping connections are offered for socket or threaded installation. Actuation packages are also available. info@plastomatic.com

Welding and Finishing

WELD EXPO CANADA

September 23 - 25, 2008
International Centre • Mississauga (Toronto), Canada
www.cmwshow.ca • 888.322.7333

Sponsored by:

Co-located with:

Canada's definitive showcase for design engineering, maintenance products and industrial support services.

Nordson Open House

Nordson Canada Corporation held an open house, June 11, 2008, at its Markham, ON, facility for customers to showcase the Encore manual powder paint gun, which organizer of the event Paul Kroes says is "the latest in spray gun technology." The Prodigy was also showcased. There were morning and afternoon sessions and the 25 attendees had an opportunity to look at the products first hand and even have a look at some booths.

Doug Penma, Stanley Tools, tries the New Encore Powder Coating Gun in the standard length.

Nordson's Paul Kroes demonstrates the iControl Powder Coating controller to Gene Varaschin, Fileco

John Shelley, Corcan Warkworth discusses HVLP with Lonnie Freeh from Nordson.

George Coke from Fileco tests the new Nordson Encore Powder Coating Gun with an extension for large objects.

Nuplex Resins manufactures a wide variety of water and solventborne resins for the coatings industry, including acrylics, polyols, thermoplastic acrylics, acrylic latex, rheology control resins, amines, alkyds, polyesters and others.

NYCO Minerals Inc.

803 Mountain View Dr., Willsboro, NY 12996

P 518-963-4262 F 518-963-4187

info@nycominerals.com

www.nycominerals.com

Contact: Dawn Revette

NYCO produces a line of wollastonite additives for all types of coatings. The mineral's acicular structure, low water solubility and basic pH give improved film cohesion and mechanical properties, reduce cracking and prevents downward pH drift for improved paint stability. Treated WOLLASTOCOAT grades act as auxiliary pigments in replacing up to 50% inhibitive pigments without sacrificing corrosion/blister resistance at significant cost savings.

P 618-646-2110 F 618-646-2188

info.us@rpgigments.com

www.rockwoodpigments.com

Contact: Jim Heney

Rockwood is one of the world's leading suppliers of inorganic color pigments such as synthetic and natural iron oxide color pigments and corrosion-inhibiting pigments. Rockwood offers a full line of red, yellow and black synthetic iron oxides. High-strength versions feature cleaner color shades, better rheology, dispersibility and color saturation. In addition to a full line of iron oxides, Rockwood offers complex inorganic pigments, natural earth pigments and PhosGuard® corrosion inhibitors. PhosGuard® proprietary corrosion inhibitors contain no lead or chrome and are the active ingredient in many rust-blocking paints and coatings. Rockwood also manufactures a wide range of zinc-based corrosion inhibitors and traditional chromates.

The Valspar Corporation is one of the largest global coatings manufacturers in the world, providing coatings to a wide variety of customers. Since 1806, Valspar has been dedicated to bringing customers the latest innovations and best customer service.

VanDeMark Chemical Inc.

One North Transit Road, Lockport, NY 14094
P 716-433-6764 F 716-433-2850

sales@vdmchemical.com

vdmchemical.com

VanDeMark's PTSL (p-Toluenesulfonyl Isocyanate) is a low-viscosity reactive additive used as a water scavenger in the formulation of specialty urethane products, including coatings, adhesives and sealants.

Venjakob North America Inc.

670 Hanwick Rd., Bolton, ON L7E 5R5
P 905-951-9966 F 905-951-9907

bschueller@venjakob-north-am.com

www.venjakob.com

Venjakob is a surface finishing technology specialist supplying spray coating lines, handling technology, special installations and air exhaust cleaning. We offer fully automated finishing lines. We provide world wide service and parts.

Vergason Technology Inc.

166 State Route 224, Van Etten, NY 14889
P 607-589-4429 F 607-589-6955

sales@vergason.com

www.vergason.com

Contact: Edward Ward

Provider of vacuum coating/metalizing equipment and toll coating services for the medical, lighting, automotive, aerospace, electronic and machine tool industries. VTI® applies wear resistant PVD coatings on tools and injection molds, as well as, functional, decorative and electronic shielding coatings on parts that have been injection molded.

Vertec BioSolvents Inc.

1441 Branding Lane,
Downers Grove, IL 60515

P 630-960-0600 F 630-960-0660

inq4vertecbio@aol.com

www.vertecbiosolvents.com

Contact: Jerry Vasek

Vertec BioSolvents is a manufacturing company dedicated to providing bio-based, renewable resource alternatives to petroleum-based solvents. We provide sustainable, HAPS free, carbon neutral, biobased replacements for existing petroleum based solvents. We currently have biobased replacements for many of the solvents used in today's complicated formulations.

Vicinity Manufacturing

145 Church Street, Marietta, GA 30060
P 770-421-2467 F 770-421-8168

info@vicinitymanufacturing.com

www.vicinitymanufacturing.com

Contact: Elizabeth Crockett

Vicinity is the premier software solution for the formula manufacturing industry. Vicinity extends the Microsoft Dynamics™ financial and distribution offerings to deliver a complete ERP package specific to formula manufacturers. Vicinity recognizes the unique needs of formula manufacturers, addressing such requirements as formula management, lot tracking, batch ticket processing, tracking QC test results, formula scheduling, compliance documentation, COA/MSDS/HAZ BOL, and country of origin.

Viking Pump of Canada Inc.

A Unit of IDEX Corporation

661 Grove Ave., Windsor, ON N9A 6M3

P 888-845-7867 F 888-803-8640

cinfo@idexcorp.com

Viron International Corp.

505 Hintz Road, Owosso, MI 48867

P 989-723-8255 F 989-723-8417

info@vironintl.com

vironintl.com

Contact: Jim Chapman

Viron is a custom manufacturer of corrosion resistant ventilation system for industry. We fabricate complete vent systems including exhaust hoods, duct (including FM Approved PVC duct systems), chemical fume scrubbers and exhaust fans from PVC, CPVC, Poly PP and FRP.

Vitro Minerals Inc.

832 East Hightower Trail,
Social Circle, GA 30025

P 678-990-5652 F 770-464-2580

technicalsales@vitrominerals.com

www.glassfillers.com

Vitro Minerals' LA Glassfillers are produced from post industrial by-product reinforcement fiberglass, are white in color, inert, have very low oil absorption, are crystalline silica free and will reduce the carbon footprint of your products. These "green" fillers can replace traditional mined mineral fillers such as calcium carbonate, mica, wollastonite, silica and nepheline syenite in paint, powder coatings, adhesives, and sealant applications.

Vulcan Catalytic Infrared

Oven Systems

300 Highpoint Ave., Portsmouth, RI 02871

P 401-683-2070 F 401-683-6450

jmartin@vulcan-mdf.com

www.Vulcan-mdf.com

Contact: John Martin

Vulcan Catalytic Systems is the leading manufacturer of custom gas catalytic infrared Powder Coating ovens, serving the Industrial metal and wood coating industries. Vulcan manufacturers the total infrared oven system starting from our highly efficient patented catalytic heaters, zoned via our unique gas pulse system (GPS) and housed in UL approved control panels.

W. Hoffmann GMBH

Alter Bahnmofueg,
Drebrer 45457, Germany

P 45544599730 F 495445557320

mail@cerdur.de

www.cerdur.de

Cerdur - high density ceramic grinding media, Zirconoxide, Censia stab. grinding beads from 0.2 to 3.0 mm sizes.

Wacker Chemical Corporation

3301 Sutton Road, Adrian, MI 49221

P 888-922-5374 F 517-264-8246

info.usa@wacker.com

www.wacker.com

Contact: Susan Cassar

Wacker is a global company participating in the chemical and semiconductor industries and a solutions provider to many key industries including construction, paints and coatings and inks. Wacker has 27 production facilities and more than 100 sales offices worldwide.

Wacker Silicones

3301 Sutton Road, Adrian, MI 49286
P 800-248-0063

www.wacker.com

Wacker Silicones is a manufacturer of high performance silicone resins, intermediates and hydrophobic additives for architectural and industrial coatings applications. In addition, Wacker Silicones has a complete line of clear, penetrating sealers to protect concrete and masonry substrates.

Wagner Systems Inc.

300 Airport Road, Unit 1, Elgin, IL 60123
P 630-503-2400 F 630-503-2377

info@wagnersystemsinc.com

www.wagnersystemsinc.com

Wagner Systems, Inc., serves the industrial market with liquid and powder coating application technology solutions. Wagner has manufactured and distributed liquid and powder application equipment since the 1970s and has over 50 years experience in the industry. From manually operated equipment to completely automated systems, Wagner is a global leader in liquid and powder coating application technology.

Water and Wastewater

Equipment Company

1466 E 357th Street, Eastlake, OH 44095

P 440-942-7070 F 440-942-3622

info@wwe-co.com

www.wwe-co.com

Contact: Frank Maresh

Water and Wastewater manufacturers Industrial wastewater treatment systems for the finishing industry. Equipment includes Clarifiers, filter presses, microfiltration systems. WWE also offers used/reconditioned wastewater systems and equipment.

Wipeco Industries Inc.

3700 St. Patrick Street, Montreal, QC H4E 1A2
P 514-935-2551 F 514-935-6653

office@wipe-it.ca

www.wipe-it.ca

Manufacturer and importer of high quality wiping cloths, stain applicators, cheesecloth, tack cloth, gloves and various other paint and stain sundries.

WHEN YOU MEASURE YOUR COSTS, DO YOUR CURRENT SUPPLIERS MEASURE UP?

TOTAL PROCESS COST IS THE TRUE YARDSTICK OF A SUPPLIER'S WORTH. YOUR METAL PRETREATMENT PROCESS ENCOMPASSES MANY FACTORS BEYOND DIRECT CHEMICAL PRICING. THESE INCLUDE CHEMICAL CONSUMPTION, PRODUCTION THROUGHPUT, FIRST RUN QUALITY, ENERGY CONSUMPTION AND WASTE GENERATION/DISPOSAL, TO NAME A FEW. INEFFICIENCY IN ANY OF THESE AREAS RESULTS IN HIGHER OPERATING COSTS FOR YOU.

AT CHEMFIL CANADA OUR FOCUS IS LOWERING YOUR OPERATING COSTS. WHETHER THROUGH SYSTEM DESIGN INPUTS, PROCESS OPTIMIZATION, AGGRESSIVE PRICING, OR ADVANCED CHEMICAL TECHNOLOGIES, WE HAVE BEEN DOING THIS FOR OVER 35 YEARS.

TO FIND OUT HOW WE HELP CANADA'S GENERAL INDUSTRIAL COATERS AND THE MAJORITY OF AUTOMOTIVE OEMS STAY COMPETITIVE, CONTACT US AT 1-800-265-5057.

Exactly your chemistry.

G-Shield™

Graffiti and dirt protection in one coat

Clariant has developed an easy-to-use, easy-to-clean, clear solution against aggressive and damaging graffiti and unsightly dirt.

G-Shield™ is an innovative, durable coating which provides protection from graffiti and grime. Markers, paints, inks, tar, sap, grease, dirt and other stains cannot permanently adhere to the G-Shield™ protected

surfaces. Additionally, G-Shield™ will not alter the normal appearance of the substrate and is resistant to commercial cleaning solutions, and aggressive brake fluids. The protected material can be cleaned numerous times without reapplication or damage to G-Shield™.

G-Shield™ can be easily applied and because it is a

thin coating, G-Shield™ is very economical – especially for large surfaces.

In addition to protection from graffiti and grime, G-Shield™ provides effective protection from UV radiation and weathering. Compared with unprotected surfaces, the G-Shield™ protected surface displayed no tarnishing, gloss reduction, scratching, or paint damage.

Looks Are Everything.

To potential buyers, how your products look and work is everything. Helping your products look their best is everything to us.

We are PPG.

Canada's leading supplier of electrocoat, pretreatment, liquid, and powder coatings.

PPG Supplies **ELECTROCOAT**, **PRETREATMENT**, **LIQUID**, & **POWDER** coatings solutions. We can meet all of your coating needs – from start to finish.

WE'VE GOT IT COVERED.

When you work with PPG, you work with our people – experts who can help you enhance your finishing process to meet your design, manufacturing and, most importantly, your sales objectives.

Helping your products look their best is our business – let us help yours. Call us today at **1.905.855.5628** or visit www.ppg.com for more information.

Need a Stripper?

Canadian Finishing Systems has the Answer.

- Environmentally friendlier Resin and Paint strippers in Steel, Aluminum and Multi-Metal formulas
- Ozone safe-No CFC's
- No Methylene Chloride, Low VOC's
- Long Tank Life for manual or automatic finishing lines with ambient or hot tank stripping.

ENCORE™

Manual Powder Spray System

Introducing ENCORE™.

The NEW manual powder spray system from Nordson.

The revolutionary new Encore manual powder spray system is packed with features to provide unsurpassed operator control, coating capability and ease of use for an unprecedented level of coating performance on demand.

System features include:

- On-Gun* controls **and display**
- One-hand powder flow adjustment or preset selection
- All-digital gun control interface
- Nordson patented Select Charge® technology
- True, closed-loop powder flow control
- Vibratory box or hopper feed
- High-efficiency pump

PERFORMANCE  DEMAND

Delivering 100,000 volts for maximum first-pass transfer efficiency, and combined with On-Gun* control that is vastly more functional and effective, the Encore system surpasses every other conventional powder spray system. Painters in complete command. Focused straight ahead on the parts being coated. With all the control capability conceivable, comfortably in-hand.

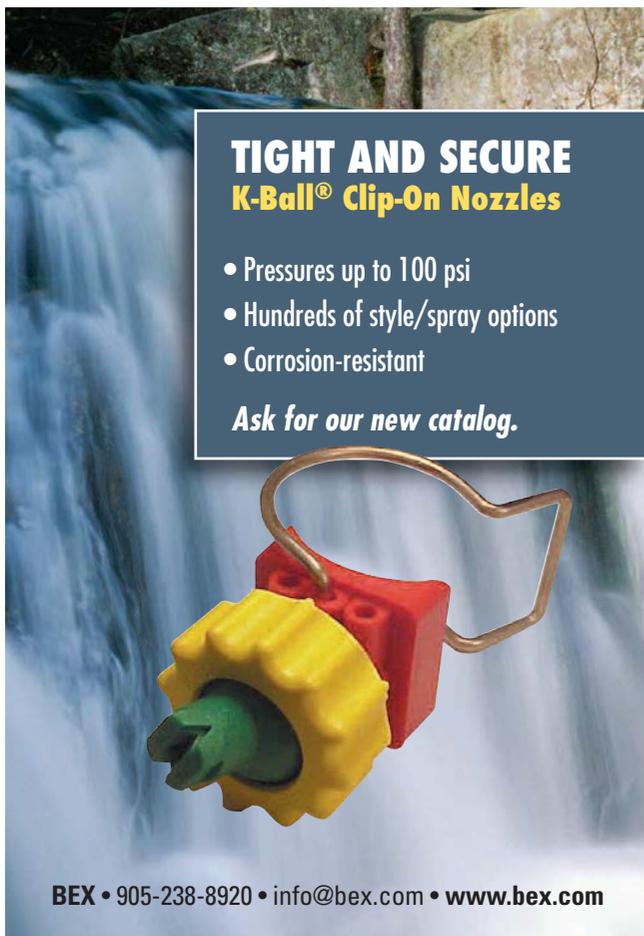

Contact Nordson today at **1.800.626.8303** or **1.440.985.4000** or visit www.nordson.com/powder.

Can-Am's Turbine-powered Liquid Spray

application system is unique. Its variety of spray guns works very well at pressure ranges of 0.5–8.75psi and cfm outputs of 9–28. These spray guns are used in many industries utilizing liquid spray application.

GREATER QUALITY. PRODUCTIVITY.

CUSTOM KIT™

QUALITY is a value we share with each of our customers and every one of our employees, because the highest quality masks make the highest quality components. Let Shercon improve your quality.

"I'm certainly going to look a lot closer at the jobs as they come in. The savings in time and productivity were huge, and they far outweighed the costs of the custom masks." MICHAEL GRAVES, Owner, Hytech Processing

UDYLITE power conversion equipment from process Electronics Corporation exemplifies engineered quality. For 55 years, PEC has been meeting demanding requirements worldwide with standard and custom designs. From closed-loop, liquid-cooled power centers to portable bench converters, UDYLITE is the metal finishing industry's choice for dependability and efficient power.

ELECTRO-STEAM GENERATOR

MONEY \$\$\$ stays in your pocket preparing metal surfaces when using an Electro-Stream Generator Cleaner. Creates a total Phosphatizing and Cleaning System for preparing metal surfaces for Powder Coating or Painting.

ADVANTAGES:

- ◆ 50-75% less chemicals used
- ◆ 50-75% less water used
- ◆ 50-75% less contained Effluent
- ◆ Exact continuous chemical mixing
- ◆ Meets several Mil Specs.
- ◆ Dries Quickly

SAFETY FIRST:

- ◆ No Dangerous Flames
- ◆ No Noxious Fumes
- ◆ No Combustable Fuel
- ◆ No Fuel Storage

MADE IN THE USA

PAINT DEFECT ANALYSIS

DEFECTS = ZERO TRANSFER EFFICIENCY!

• Defect Analysis In-House Training

Theoretical and practical training, Statistical Process Control and Tracking, Sample collection, Root Cause Methodology, the use of Microscopy onsite

• Paint Defect Analysis Studies

Identification, Tracking, Root Cause Analysis and Elimination of Paint Defects

• Best-Practice Sharing

Fifteen years of experience in OEM, Tier 1 and Tier 2 facilities in North America enables us to source new and innovative solutions for resolving paint defect issues affecting production yields.

“Therma-Tron-X gave us a great system. We’d do it all over again.”

Rich Lain, President
 Rex Gephart,
 Sales Manager
 Creative Coatings
 Fort Wayne, Indiana

When powder coating customers asked Creative Coatings - a Fort Wayne, Indiana, contract shop - if they could add electrocoating to their services, company President Rich Lain decided to become a source for both processes. For e-coat equipment, he turned to **Therma-Tron-X**.

A SlideRail Square Transfer™ (SST) electrocoating system not only fit into their building, it offered a second color option down the road. The SST handles both steel and aluminum substrates and included reverse osmosis, iron removal and wastewater treatment equipment.

“Therma-Tron-X brought a lot of experience to the table and came highly recommended by e-coat paint manufacturers. Since installation, the best part has been their rapid response to our questions. TTX gave us a great system. We’d do it all over again.”

Call Therma-Tron-X today for a finishing system that’s the right fit for your business.

TTX Therma-Tron-X, Inc.

Paint & Coating Raw Materials

Together...making waves in the pond

Andicor Specialty Chemicals is a full-service national distributor of specialty chemicals and packaging. Our mission is to be a seamless extension of the suppliers we represent, offering:

- competitively-priced value-added products from some of the world's leading producers
- superior customer service
- knowledgeable and responsive sales staff
- local warehousing and delivery services

Calcium Sulphate.
The filler choice that
is right on the money.

Calcium sulphate, commonly known as gypsum, can replace about 15% of titanium dioxide, resulting in substantial savings. And it's less abrasive than many fillers, so there's less wear on your equipment. **To learn more about how calcium sulphate can improve your business and save you money, contact CGC at 905-803-5607.**

Improve Your Paint's Performance

When the objective is better performance and value, the solution is MINEX[®]. Produced from silica deficient nepheline syenite, MINEX functional fillers and extenders offer formulators a unique combination of physical and chemical properties. With exceptional resin demand, color development, chemical and photochemical stabilizing capabilities, MINEX can actually extend the service life of architectural and industrial paint and coatings. Thirty five years of real-time exposure and durability tests verify that MINEX is the best, most versatile functional filler under the sun.

Paint & Coating Raw Materials

**Finally, a super durable pigment that has excellent dispersion properties, high initial gloss and exceptional gloss retention...
 DuPont™ TS-6200 titanium dioxide**

TS-6200 is suitable for most exterior applications, including automotive, aerospace, powder, coil and general industrial.

Take advantage of the performance of TS-6200 to lower the cost of expensive super durable coatings.

DuPont™ TS-6200 titanium dioxide delivers a unique combination of:

- Weatherability
- High initial gloss and gloss retention
- Excellent hiding power
- Reduced cost

© 2006, Rohm and Haas Company

Innovative Products For Innovative Industries

Rohm and Haas has been serving the Canadian Paint and Coatings Industry for over 50 years with a full-range of innovative binders and specialty additives for the Architectural Coatings, Industrial Finishing, and Building and Construction industries.

Our expertise and commitment to innovative products, consistently high quality, and outstanding customer service continues today as we introduce new binders and additives to meet the challenges of the Canadian market and emerging environmental regulations.

To learn more about our wide range of products, contact your Rohm and Haas technical representative, or visit us at www.rohmhaas.com.

- New 100% acrylic low-VOC binders for high-performance interior and exterior paints
- New technology platform for high-performance, low-VOC industrial coatings
- New rapid-drying resin for cool weather highway markings
- New solvent-free, highly-efficient rheology modifiers
- New broad-spectrum high-performance biocides being developed for in-can and dry-film protection

THE CONN BLADE®

Patented blending/dispersing blade design makes radical improvement over old saw tooth designs

- * Most efficient and aggressive blending/dispersing blade available.
- * Provides proper combination of pumping action and shear/dispersion essential for fast consistent results.
- * Built in pumping action cuts processing time.
- * Longer life due to heavier gauge construction.
- * Less heat due to shorter required running time.
- * Excellent for high or low speed and high or low viscosity.
- * Supplied with hubs or mounting holes required to retrofit and upgrade present equipment.
- * Pumping blades without teeth are available and are excellent for gentle blending and agitation.

Surface Finishing Conference & Exhibition November 20, 2008

White Oaks Conference Resort & Spa (Niagara-on-the-Lake, ON)

PLAN TO ATTEND! LIST OF TOPICS INCLUDE:

- A Report on the Metal Finishing Energy Efficiency Benchmarking Study
- Canada's Commodity, Construction and Service Economy
- Updates in Environmental Legislation That Affect the Canadian Surface Finishing Industry
- Global Environmental and Economic Trends Impacting the Surface Finishing Industry
- Ontario Ministry of Labour's Targeted Firms Initiative
- How Source Water Protection Initiatives (under NEW Clean Water Act) Will Impact Industry in Ontario

Visit www.thecasf.ca for more information

It's Good to Go Green...

ZERO VOC Preservatives & Additives

Dry Film Preservatives*

Polyphase® 663 • Polyphase® 678

In-Can Preservatives

Mergal® K10N • Mergal® 399

Wetting & Flow Additives

Troysol™ ZLAC • Troysol™ LAC

Defoamers

Troykyd® D704 • Troykyd® D720
Troykyd® D726

Troy Corporation sets the Gold Standard for material protection and performance — Environmentally friendly products designed to meet or exceed the toughest measures of compliance while improving performance:

- VOC-free biocides that set the standard for material protection in paint and coatings
- Zero and low VOC additives that maintain high performance with little or no contribution to VOC

Bonderite®

Naturally Innovative

**BONDERITE® NT-1™
AND NGC**

Bonderite® NT-1™ and NGC

THE NEW COATINGS STANDARD

Henkel knows that reducing manufacturing costs and improving quality and productivity, while helping businesses become environmentally sustainable, begins with innovation. Bonderite® NT-1™ and NGC (New Generation Coating), Henkel's groundbreaking nanoceramic paint pretreatment systems, set new industry standards that streamline the conventional coating process, reduce costs and protect the environment.

CAPABILITIES

Bonderite® surface pretreatments for conventional powder and wet paint coatings can be applied by immersion or spray applications, creating a cohesive, inorganic, high-density layer. Specifically formulated for use on steel, zinc and aluminum surfaces, Bonderite® NT-1™ and NGC pretreatments provide an ultra-thin coating, replacing iron and zinc phosphate, thereby reducing environmental impact and increasing corrosion resistance on painted metal surfaces.
