New, Triple Seal - Triple Latch patented Snap Lock closure forms a superior seal that eliminates leaks and product contamination.

Exclusive proprietary surface treatment prevents product skinning.

New, ergonomically-designed bail is all plastic. Branding identification is available.

Superior Performance at last...

- Zero rust/corrosion on plug, ring or body!
- Zero dented, damaged, discounted product on display!
- Zero lid skinning issues!
- Zero leakage when properly closed!

The research, engineering and continual improvement behind KW's ALL Plastic and Hybrid Container family is unparalleled in container manufacturing. Why pay more for less? The KW ALL Plastic Container clearly delivers performance, protection and value for your water-based coatings.

KW's ALL Plastic Container is the CLEAR CHOICE for containing and delivering your valuable formulations.

Available in 5-liter, 4-liter, gallon, 2-1/2 liter, 1-liter, quart, 1/2 liter, pint and 1/2 pint capacities.

KW Container

Expect more from your container supplier.

Made from 100% Recycled Plastic • 100% Recyclable • User Friendly

110 Henderson Hwy • Troy, AL 36079 • (800) 633-8744 • www.kwcontainer.com

ABB Inc.

201 Westcreek Blvd, Brampton, ON L6T 5S6
P 905-460-3000 F 905-460-3019
lauren.ciampichini@us.abb.com
www.abb.ca

ABB is a leading supplier of industrial robots – also providing robot software, peripheral equipment, modular manufacturing cells and service for tasks such as welding, assembly, painting, picking, packing, palletizing and machine tending. Key markets include automotive, plastics, metal fabrication, foundry, pharmaceutical and food and beverage industries. A strong solutions focus helps manufacturers improve productivity, product quality and worker safety.

ACE Equipment Company

4725 Manufacturing Road,
Cleveland, OH 44149
P 216-267-6366 F 216-267-6366
sheran@armaturecoil.com
www.armaturecoil.com

Family owned since 1919, ACE Equipment manufactures Burn Off and Curing Ovens. The unique design provides high efficiency, uniform temperatures and long life.

Aceto Corporation

4 Tri Harbor Court, Port Washington, NY 11050
P 516-627-6000 F 516-627-6093
rgoodman@aceto.com
www.aceto.com

Contact: Roy Goodman

Aceto Corporation offers a wide range of chemicals for specific use in epoxy, urethane, UV-cured, powder, and polyurea coatings. These include a number of performance additives and a complete line of organic pigments, TiO₂ and free-radical and cationic photoinitiators.

ACT Test Panel Technologies

273 Industrial Dr, Hillsdale, MI 49242
P 517-439-1485 F 517-439-1652
brad.kimpell@acttestpanels.com
www.acttestpanels.com

A wide range of products including ACT Certified Test Panels for coatings R&D; utility grade TRU panels for spray outs and hiding evaluations; appearance panels including color, orange peel, and powder smoothness standards and corrosion supplies for laboratories.

Adroit Automation, Inc.

704 California Avenue, Rochester, PA 15074
P 412-292-0127 F 412-220-3066
andrew@adroitblue.com
www.adroitblue.com

Contact: Andrew Maude

Adroit produces turnkey automated process lines. All systems are designed and commissioned by in-house employees; including controls, hoists, tanks, ventilation and WWT. Adroit's software package WinHoist optimizes random loading, integrates all process equipment and provides full data documentation "quality compliance in-a-box."

Adwest Technologies, Inc.

1175 North Van Horne Way,
Anaheim, CA 92806
P 714-632-9801 F 714-632-9812
adwestny@roadrunner.com
www.adwestusa.com

Contact: Richard Whitford

Adwest has installed over 800 RETOX Dual Chamber Regenerative Thermal Oxidizers for 99 per cent VOC control for finishing, spray booth, surface coating, chemical and curing oven applications. RETOX RTOs with Natural Gas Injection (NGI) provide Flameless NOx-Free operation with up to 97 per cent primary heat recovery for low energy consumption.

AGC Chemicals Americas

55 E. Uwchlan Ave., Exton, PA 19341
P 805-583-5917 F 805-583-5917
winn.darden@us.agc.com
www.lumiflona.com

Contact: Winn Darden

LUMIFLON fluoropolymer resins are used to make ultra-wettable coatings for architectural, industrial maintenance, aerospace, alternative energy, and automotive applications. Products include solvent based resins, solid resins for low VOC coatings, water based resins and powder coating resins.

Akzo Nobel Decorative Paints (DULUX Paints)

8200 Keele St., Concord, ON L4K 2A5
P (519) 281-7066

P 416-988-7576 F 905-397-1072

ryan@duroair.com

www.duroair.com

Contact: Ryan Watt

Duroair is the leader in innovative airflow and filtration technology. Duroair can manufacture any size enclosure you're looking for and will match the airflow required to produce the perfect finish, quality and compliance. Our retractable enclosure are a cross draft design where we increase the amount of airflow during the dry cycle to wick the moisture out of the paint and achieve faster dry times. The patented tapered airflow focuses the air down the center of the enclosure with almost no airflow down the walls, ceiling or floor. This allows for the optimal capture of overspray and reduces any dust or dirt transfer. The enclosure retracts to less than 20% of the extended length saving you your valuable floor space when not in use. The system can be assembled or torn down in approx in hours, not days to allow for portability from site to site.

Contact: Jerry Turner

Vitro Minerals' LA and CS Glass fillers are produced from post-industrial or post-consumer glass, are white in color, inert, have very low oil absorption, are crystalline silica free and will reduce the carbon footprint of your products. These "green" fillers can replace traditional mined mineral fillers such as calcium carbonate, mica, wollastonite, silica and nepheline syenite in paint, powder coatings, adhesives, and sealant applications. Products are available from 4 to 325 mesh.

VRSim, Inc.

222 Pitkin St., East Hartford, CT 06108
P 860-893-0080 F 860-893-0079
kristin.bodner@vrsim.net
www.vrsim.com

VRSim creates virtual reality training systems designed to enhance basic skills training for military and defense organizations, industrial trades, and education and research groups. VRSim is the power behind SimSpray, an instructional tool that trains painters and coaters faster while reducing training costs.

Vulcan Catalytic Industrial Infrared Oven Systems

Why do more manufacturers turn to CanLak for green products today?

Our research center has developed products and systems in low VOC, low formaldehyde and waterborne UV to help keep your company stay ahead of the curve for Regulatory requirements, and Green Programs.

You will be surprised at how quickly CanLak can help your finishing operation gain an edge over the competition.

Your time and money gets the returns you're looking for with CanLak

To Do's:

1. Imagine.
2. Bring to life with Valspar.
3. Stand back and enjoy.

Do more than you ever dreamed possible with your woodworking jobs.
Valspar offers innovative, easy-to-use and apply products and superior support that help bring your ideas to life. So dream it, create it, and enjoy the results.

Shield your metal from RUST

Chemetall's line of Rust Preventives can meet your most stringent protection requirements with solutions ranging from Solvent/Oil based to Emulsions to Synthetics

Chemetall's Rust Preventives Offer:

- Outstanding array of solutions to match your application needs
- Highest level of performance ranging from short-term to long-term
- Significant cost savings resulting from fewer rejects and returns due to rust
- Low/No VOC

ANNADALE FINISHING SYSTEMS

ANNADALE provides manufacturing and processing industries with innovative, reliable and cost effective solutions for coatings application and fluid handling challenges.

With years of accumulated experience we are able to provide improved finish quality, reduced operating costs, increased productivity, enhanced application efficiencies and an effective return on investment.

Whether you require a custom engineered turnkey system, a finishing line component, upgrade or retrofit to existing equipment, we would appreciate the opportunity to assist you.

- Conveyors
- Robotics
- Blasting Equipment
- Solvent Recovery
- Water Wash Booths
- Application Tools – Conventional, HVLP, Air Assisted Airless, Airless & Electrostatic
- Chemical Pretreatment
- Automation & Integration
- Air Make Up
- Process Piping
- Paint Mix Rooms
- Liquid & Powder Spray Booths
- Gas, IR, & UV Dry Off & Cure Ovens
- Piston & Diaphragm Pumps
- Electronic Paint Proportioners
- Paint Circulation Systems

Annadale also represents the following quality equipment manufacturers:

- Graco
- Aro
- Titan Air
- Wagner
- ABB Robotics
- Jervis B. Webb
- Binks
- CCI DriQuik
- Maxon
- Devilbiss
- Fusion UV
- Sata

Annadale would appreciate the opportunity of working with your engineering, production, purchasing, and maintenance teams from the application concept stage through to installation, start up, training and after sales service.

Duroair™
the evolution of air

The industry's most adaptable line of retractable paint booths

Learn more at www.duroair.com or call 905.397.1099

Duroair has designed the industry's most adaptable line of retractable paint booths, helping customers save time and money. The patented airflow and filtration technology captures over 99% of the airborne particulate and reduces dry times by increasing the amount of airflow during the dry cycle. With a standard size enclosure of 9'H x 14'W x 24'L which retracts to 4'L, Duroair provides solutions where fixed booths cannot. Custom sizes are also available. The variable speed 13,500 CFM exhaust system has the balanced airflow required to produce the perfect finish, quality and compliance. Duroair paint booths allow you to save on valuable shop floor space without compromising on the quality of your paint job.

Clip-On Nozzle with Quick-Disconnect Tip!

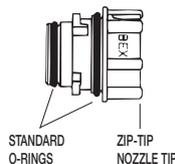

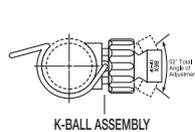

MOLDED PLASTIC QUICK DISCONNECT **K-BALL® / ZIP-TIP®** **SPRAY NOZZLES**

US PATENT 5,421,522 OTHER PATENTS PENDING

- No tools required for ZIP-TIP nozzle tip installation or removal
- Once you set your spray pattern, you can remove and clean the tips without disturbing the alignment
- Seals located on and removed with nozzle tip for easy flushing
- Standard double Viton "O"-ring seals
- New seals supplied with each new nozzle tip
- Reduces maintenance time and cost by a simple 1/4 turn of the nozzle tip
- More models and spray patterns available
- Only BEX Clip-ons offer the unique "finger" positioning system

Caps'n Plugs 

- **Largest stock of silicone and EPDM maskings in Canada.**
- **Best prices for standard maskings in Canada.**
- **Very competitive prototype, production tool and piece costs for custom designed maskings.**
- **Now have tape slitting capacity in-house including our new sandblasting tape.**
- **Free catalogue and samples upon request.**

Because the last thing you do is the first thing your customer sees.

The finish.

Fine finishing brings out the best in your best work.

The full-line of Cefla finishing solutions will give you better results, faster, for less.

Our fully-outfitted lab is ready to test your finishes, your products, and your ideas.

If it's coated, we can help.

Let's get started on an investment in your future. Give us a call so we can get started. Or, e-mail Dale Dozeman: ddozeman@ceflaamerica.com

PosiTest® Pull-Off Adhesion Tester

Measures adhesion of coatings to metal,
 wood, concrete and other rigid substrates—
 revolutionary self-alignment feature
 and pull rate indicator

**NEW
 Automatic
 Model**

- New electronically controlled hydraulic pump automatically applies smooth and continuous pressure
- Test with the simple push of a button. No twisting, pumping or cranking. No valves to close, needles to reset, or scales to adjust
- User-selectable pull rates ensure compliance with international test methods

MiniTest 70 & 700 Series with SIDSP®

Coating thickness testing gauges for coatings applied over metal substrates

From the manufacturers
 of the **eXacto®**

MiniTest 700 Series

720 built-in probe
 730 probe on a lead
 740 user selectable probe configuration

With SIDSP® Digital Sensors

Analog signal processing has served its time
 SIDSP® Digital signal processing is the future

- User selectable units of measure mils/μm
- Ferrous, Non-Ferrous and "combo" models
- Highest accuracy
- Repeatability and Resolution

MiniTest 70 Series

Portable
 Reliable
 Accurate

ElektroPhysik USA Inc.
 advancing with technology

Coating thickness and coating related quality control and physical test instruments

Exclusive agent for **Sheen Instruments**...viscosity, film application, adhesion, color, gloss and physical test devices

Win-Win

Performance Meets Ease-of-Use

Thanks to Graco, you get the ultimate win-win. The ProMix 2KE proportioner mixes paints easily and consistently – an impressive feat for this low cost, entry level unit.

Expensive re-work is virtually eliminated and servicing is a snap! Plus, you save time and money with better processes, less waste and shorter drying times.

Contact us today for more information!

NORSPEC

FILTRATION

NORSPEC FILTRATION LTD. is an industry leader in the supply of filtration products, serving the paint and coatings industry for close to 25 years. Norspec offers filters for both the industrial paint spray market and automotive collision repair aftermarket. Filters for downdraft spraybooths, crossdraft spraybooths, panel filters, diffusion media pads and blankets, paint overspray filters, high temperature filters, replacement filters for powder booths, compressed air filtration, compressor filters or liquid filtration. We are Canada's single source for filters.

CANADA'S
Paint Booth Specialists!

"For All Your Paint Booth Filtration Needs"

- Diffusion Media
- Paint Arrestors
- Intake Air Filters
- HiTemp Filters

Industrial Solutions

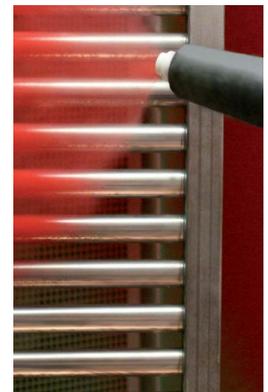

Liquid or Powder

Either way, Wagner gives you a finish worth repeating.

Wagner can meet your specific liquid or powder coating needs with our full line of solutions, from manual spray equipment to fully-automated finishing systems. We offer all the technologies that address your entire "process chain" – from feeding and mixing, to movement and regulation, to final surface application. We guarantee exceptional and repeatable results of the highest quality, even for uncommon-shaped objects or the most complex of coating processes.

With Wagner, everything is under control.

Wagner Systems, Inc.

Phone: 800.473.2524

www.wagnersystemsinc.com/lp

Non Contact Marking

Possible uses:

- Checking weld seams and sheet metal
- Checking engine blocks, crankshafts and camshafts
- Marking blow holes during glass production
- Cutting and bending lines for cardboard packaging
- Line marking for manufacturing
- Paint marking to aid assembly
- Paint marking for logistics

HVLP & HVLP+ Technology

The innovative HVLP-Plus nozzle/air cap system (blue air cap) ensures high material savings and an excellent fine surface finish. Measurements by the Fraunhofer Institute for Manufacturing, Engineering and Automation using the EN-Norm 13966-1, produced a transfer efficiency of up to 88%. This is much higher than the 65% required for HVLP applications

Pressure Tanks

Standard pressure tanks are available in many sizes ranging from 1-250 liters.

Options Available:

- Stainless Steel or Galvanized Steel
- Pneumatic Agitators
- Ex-Proof Electric Agitators
- Level Sensors
- Jacketed Pressure Tank
- Sight Glass

Formulation Performance
 and Problem Solving

A.S. PATERSON COMPANY LIMITED

Strong technical expertise complemented by exceptional customer service.

A.S. Paterson Company provides customers with access to the technical expertise of our sales representatives, as well as, many leading material suppliers from around the world. Customers gain access to formulation assistance and product testing through supplier laboratories. Finally, we offer assistance in understanding and complying with Canadian regulations.

A.S. Paterson distributes pigments, waxes, resins and other chemical materials right across Canada from multiple warehouse locations. We pride ourselves on being a National distributor with over 85 years of experience serving our customers.

As a result, you will find that A.S. Paterson is a reliable and responsible chemical distribution company who firmly stands behind all of the products we represent.

A.S. Paterson Company Limited

Lonza

Proxel® BZ Plus Preservative
Supporting Sustainable Solutions

Lonza Microbial Control provides innovative and cost-effective solutions that bring your products up to today's sustainability standards, while providing the protection you've come to rely upon.

Our products include:

- Low and formaldehyde-free solutions
- Color-stable formulations
- Dual-action protection
- Zero VOCs
- CMIT / MIT-free solutions
- Broad-spectrum activity
- Long-term preservation

www.lonza.com

Use biocides safely. Always read the label and product information before use.

HDTS CHEMICALS INC.

HDTS Chemicals provides the following services:

- New Substance Notifications (NSN)
- Canadian Agent for NSN
- Importer of record for NSN

- Site specific customized training for **WHMIS / TDG / GHS**

- Authorized MSDS authoring distributor **CANWrite™ (CCOHS) / TECIS® (Trivalent)**

- MSDS authoring services
- Supplier partner to the CACD
- Proud supporter of You Be the Chemist

Together... making waves in the pond

Andicor Specialty Chemicals is a full-service national distributor of specialty chemicals and packaging. Our mission is to be a seamless extension of the suppliers we represent, offering:

- competitively-priced value-added products from some of the world's leading producers
- superior customer service
- knowledgeable and responsive sales staff
- local warehousing and delivery services

Better protection. Safer chemistry.

Add better protection with
Buckman's Flamebloc® GS
series fire retardants

The Flamebloc GS series fire
retardants comprise Buckman's
new portfolio of environmentally
responsible fire retardants designed
to meet industry needs for green fire
retardant technology.

Flamebloc GS products are
composed of a new and novel
technology based on amino
functional ammonium polyphos-
phate chemistry.

These clear, water-based, zero VOC
products do not require a halogen
donor in order to provide char-
forming or intumescent substrate
protection, meeting a host of
standards and specifications
required in many industries.

Buckman

Commitment makes the best chemistry.

*Together we go **beyond** chemistry*

*Ensemble nous allons **au-delà** de la chimie*

Distributing specialty raw materials to the coatings, inks, plastics and adhesives industries.

We are the only Canadian distributor with a state of the art laboratory providing innovative solutions.

We are your active intermediate.

Distributeur de matières premières de spécialités aux industries de la peinture, de l'encre, du plastique et des adhésifs.

Nous sommes le seul distributeur canadien avec un laboratoire à la fine pointe de la technologie pour des solutions novatrices.

Nous sommes votre intermédiaire actif.

Altifil™
 Altiplus™
 Altibright™

Exceptionally white extender
 Exceptionally high dry & wet brightness
 Excellent opacity & hiding capabilities
 Ease of dispersion in water & alkyd systems
 Excellent chemical resistance
 Available in a range of Hegman sizes (4,5,6)

Looking for savings in your formulation?

Get the brightness and properties of a calcined Kaolin clay without having to pay for the price of a calcined Kaolin clay.
 Made in Canada. Contact us today.

Are You Ready?

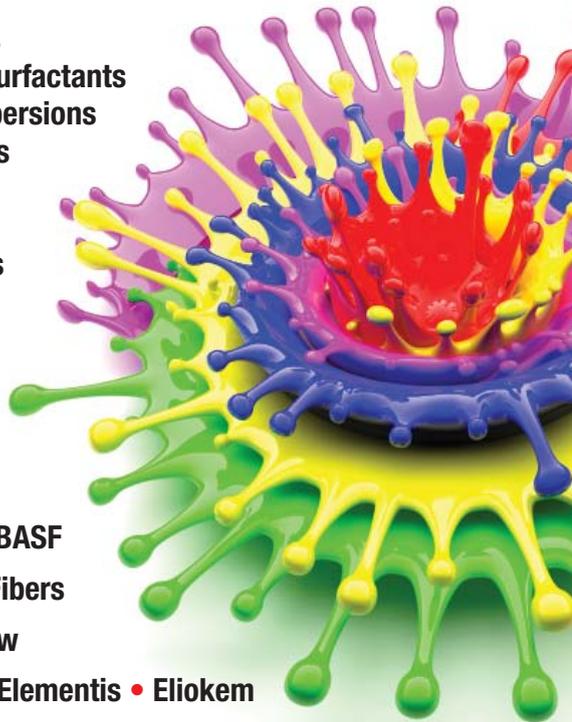

LOW VOC Solutions - Ready to Launch.

The LOW VOC

- Biocides
- Coalescent Agents
- Dispersants and Surfactants
- Pigments and Dispersions
- Rheology Modifiers
- Surface Modifiers
- TiO₂ replacement
- Waterborne Resins and Crosslinkers
- High Solid Resins

From the Manufacturers You Trust:

- AGC • Arkema • BASF
- Clariant • Creafil Fibers
- CVC/Emerald • Dow
- Dura Chemicals • Elementis • Eliokem
- FP Pigments • Hoover • Huntsman
- Lubrizol • Lonza(Arch) • NYCO Minerals • PPG • US Polymers

Northspec
Effective
September 1, 2012

Introducing **Chromaflo Technologies**, the largest independent global colorant provider to the coatings and thermoset markets!

Newly created by the integration of the Colortrend and Plasticolors businesses, our diverse technical and custom manufacturing capabilities provide color solutions to meet the most complex requirements.

Let us show you how our strong customer focus and collective industry experience position us as the market leader in color... Contact your local Chromaflo representative today!

Chromaflo Technologies . . . Where Art Meets Technology!

Dow Coating Materials 1 7

LOOKING FOR NEW INNOVATIONS IN COATINGS TECHNOLOGY?

- Create a unique colour space using new pigment chemistries and shades
- Formulate an energy savings coating using IR-reflective pigment technology
- Achieve a more durable anti-corrosive coating
- Realize optimum production efficiencies with alternative delivery forms
- Produce high-performance, low-VOC coatings with the latest water-based resin technologies

PROVIDING YOU WITH LOCAL SOLUTIONS FROM GLOBAL BRANDS YOU KNOW AND TRUST

- Ascotec • Cappelle • CCA Colorants • Eckart • EPS Resins
- James Brown • Minifibers • Sartomer • Tiangang Light Stabilizers
- Toyo • Ultramarine • Worlée Chemie
- Ferguson resins, pigments, and additives

GLOBAL PARTNERS | LOCAL SOLUTIONS

One Network.

A world of solutions for the coatings and adhesives industry.

Innovative choices offering product-based answers to green formulation challenges and VOC regulation

Powerful perspective from our expert network that provides world-class product development knowledge from concept to commercialization

Exceptional product access to the latest materials and technologies to help you bring environmentally friendly products to market

ADHESIVES & COATINGS

Create a performance breakthrough with Dow Corning.

Achieving effective wetting can be a challenge for formulators of waterborne and UV coatings, paints, inks and overprint varnishes.

That's why Dow Corning developed its innovative family of superwetting silicone additives. These new materials provide consistent wetting performance across a wide range of formulations and substrates, including difficult-to-wet surfaces like wood, plastic and metal.

Learn how you can create formulations with great wetting performance. Visit dowcorning.com/powerup.

Univar partners with Dow Corning to provide you innovative new products.

Superior in Clear Coats

MINEX® delivers unique physical and photo-chemical properties ideally suited for clear coats. Its low refractive index is best utilized in transparent wood and furniture coatings, where MINEX can be loaded up to 20% without excessive haze to improve hardness, light stability and moisture resistance.

Troy Introduces New Universal Mar & Slip Additive

Troy Corporation introduces the latest addition to its Z-Line of multifunctional, environmentally friendly performance additives: Troysol Z372. Z372 is a high performance universal mar and slip additive that improves the wetting of low surface energy and contaminated substrates, resulting in uniform film coverage. Engineered for solvent, solvent-free, and aqueous systems, Z372 improves resistance properties, gloss, and surface appearance in most systems. Z372 is well-suited for coatings and related products in which surface slip and/or resistance properties, such as block, stain, or scrub resistance, are required. Like all Troy Z-Line performance additives, Z372 is a zero VOC, HAPS-free, APE-free product formulated with renewable resources.

"Troysol Z372 is a high performance additive that delivers a great deal of value to coatings manufacturers. By accomplishing the functions of several additives and with typical use levels as low as 0.1 per cent by weight, Z372 offers manufacturers the opportunity to achieve performance benefits in a cost-effective manner," says Dr. Izzy Colon, VP/General Manager Additives.

Troy Corporation develops and manufactures specialty materials that enhance the properties and performance of its customers' products and processes, and is committed to helping manufacturers meet global requirements for compliance and sustainability. Founded in 1950, Troy is headquartered in Florham Park, New Jersey with sales offices throughout the United States, Canada, Europe, Asia, and Latin America. Troy materials are used and available in over 100 countries worldwide.

Measuring Electroplated Nickel Coatings with the FISCHER MMS NICKELSCOPE

Fischer Technology's MMS NICKELSCOPE is a multi-measurement system using the Hall Effect test method for non-destructive coating thickness measurement of electroplated nickel coatings on electrically non-conductive or non-ferrous substrates as well as non-ferrous metal coatings (copper, aluminum, lead etc...) on steel. It is also ideal for measuring thick non-ferrous coatings.

- Up to 50 application memories
- 20,000 measurements in up to 2000 groups (blocks)
- Large, easy to see flat screen LCD Display
- Full statistic and graphic evaluation capabilities
- Fischer DataCenter Software expands the functionality of the unit for convenient transfer, evaluation and printing of measurement data to personalized inspection reports
- Conforms to DIN EN ISO 2178

Contact Fischer for additional data and features. Fischer Technology, a U.S. manufacturer of coating thickness, material testing, and material analysis instrumentation.

New SATA Pressure Fed Gun

SATA has introduced a new, particularly lightweight pressure fed gun designed for the manual serial coating of small and complex parts. The SATAminijet 1000 K, can be connected via double diaphragm pumps, pressure pots or central material supply systems for greatest versatility.

Due to its compact and ergonomic design and its low weight, the SATAminijet 1000 K allows working without fatigue, even when being used on a long-term basis in industrial applications. In addition, it is an easy to operate gun, which can be very precisely adjusted.

This spray gun is available in the nozzle sizes 0.3, 0.5, 0.8, 1.0 and 1.2 is also a perfect piece of equipment for decorative and design applications, such as the toy or cosmetic industry.

Another area of use can be found in the plastic and metal working industry where release agents and lubricants need to be applied on diecasting or forging moulds.

The SATAminijet 1000 K is available in optimised RP high pressure technology (Reduced Pressure = reduced atomisation pressure), which combines fast application speed with high transfer rates.

The SATAminijet 1000 is also offered in a suction cup version with 1.4 nozzle size for smaller surfaces.

FIELDING

THE SCIENCE OF SUSTAINABILITY™

Choose a green solution for your spent solvents and refrigerants and connect with **Fielding** to bring THE SCIENCE OF SUSTAINABILITY™ to your triple bottom line.

Fielding applies science and award-winning technologies to provide customized and sustainable results.

Registered to ISO 9001, ISO 14001 and verified to Responsible Distribution®, customers rely upon **Fielding** for Cradle to Cradle® Care of Chemicals.

Be part of **Fielding's** Mission and commit to sustainable management practices to create enriched lives for staff and community, with a net positive environmental impact and financial success ... people, planet, profit.

REPURPOSING

PROCUREMENT

CUSTOMIZING

Fielding recognizes the inherent value of your spent solvents and refrigerants. Repurposing spent chemicals is the core of our business, a business we began in 1955.

Companies in the pharmaceutical, printing, graphics, automotive, HVAC and manufacturing industries rely on **Fielding** for environmentally friendly products and services.

THE CONN BLADE®

**** NOW AVAILABLE OF U.H.M.W. POLYETHYLENE ****

- * **Most efficient and aggressive Poly Blade available.**
- * **Provides combination of pumping action for material turnover and shear/dispersion.**
- * **Low shear without teeth also available.**
- * **Gives much longer life than typical metal blades.**
- * **When leading edges are worn blade can be turned over to start like new.**
- * **Supplied with mounting holes and/or mounting hubs as required.**
- * **Also available of polyurethane, nylon, teflon, polypropylene and other materials**
- * **Call or e-mail for pricing and availability.**

Since 1948

AAC Aluminum Anodizers Council

21st Annual International Anodizing Conference

Part of Aluminum Week!
October 15-18, 2012
 Renaissance Chicago Downtown • Chicago, Illinois

- Combined General Sessions
- Breakout Sessions
- Student Poster Session
- Networking Events
- Optional Workshops
- Plus much more!

SAVE with wallet-friendly options including early and team registration discounts.

Hurry! Early discount ends September 7, 2012. Visit www.AACconf.org for details!

COATING 2012

PAINT &
POWDER COATING
TECHNOLOGIES

Enter *the Gateway to
Coating Resources*

October 9-11, 2012

America's Center • St. Louis • Missouri

COATING 2012 will offer unique opportunities to make new sales, generate new leads, increase brand awareness, and do business with qualified buyers, all there for one reason – **coatings**.

- Qualified attendees with the power to buy
- Leading manufacturers, distributors, suppliers, and contractors
- High-quality technical conference presented by industry leaders
- A centrally located event positioned to bring hundreds of drive-ins
- A venue that introduces new product technologies

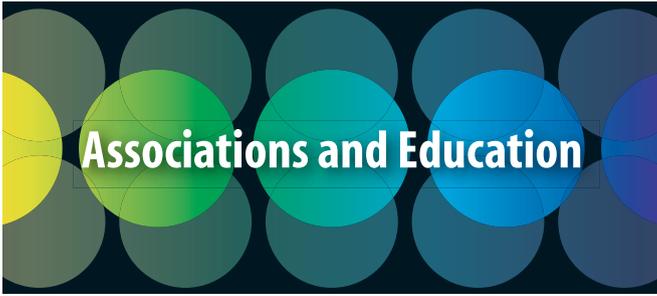

Booth reservations now open at www.coating-show.com.

CASF ENVIRONMENTAL FORUM
 Environmental and Regulatory Update for the Surface Finishing Industry

Tuesday, November 13th, 2012
 8:30am - 4:30 pm

Hilton Garden Inn Toronto
 3201 Highway 7 West, Vaughan, ON

Space is limited, pre-register to confirm your attendance.
 For more information on event details and registration
please visit www.CASF-Forum.ca

Guest speakers to include representatives from Environment Canada, Ontario Ministry of Environment (MOE), NiPERA - Nickel Institute, NASF and others!

Who Should Attend?
 Environmental Managers, Supervisors and those responsible or interested in environmental and regulatory issues for your company, Managers and Business Owners.

Early Bird registration before Oct.1/12
 \$150 per person (\$175 after Oct. 1)
 \$400 per exhibitor (\$500 after Oct. 1)
 Includes coffee breaks, snacks and lunch.

Chrome Plating Replacements for Engineering Applications

Association News

CFA Annual Conference and AGM
 The Canadian Finishing & Coatings Association (CFA) is pleased to announce the 2012 Annual Conference and AGM, which will be held on September 11-12, 2012 at the Sheraton Hotel in Toronto, Ontario. The conference will feature a variety of speakers and topics, including the latest in chrome plating technology and its applications in engineering. The conference will also include a networking reception and a dinner. For more information, please contact the CFA at www.cfcma.ca.
